

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

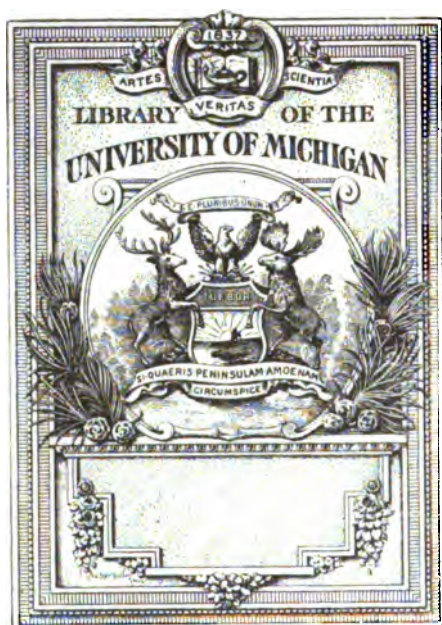

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

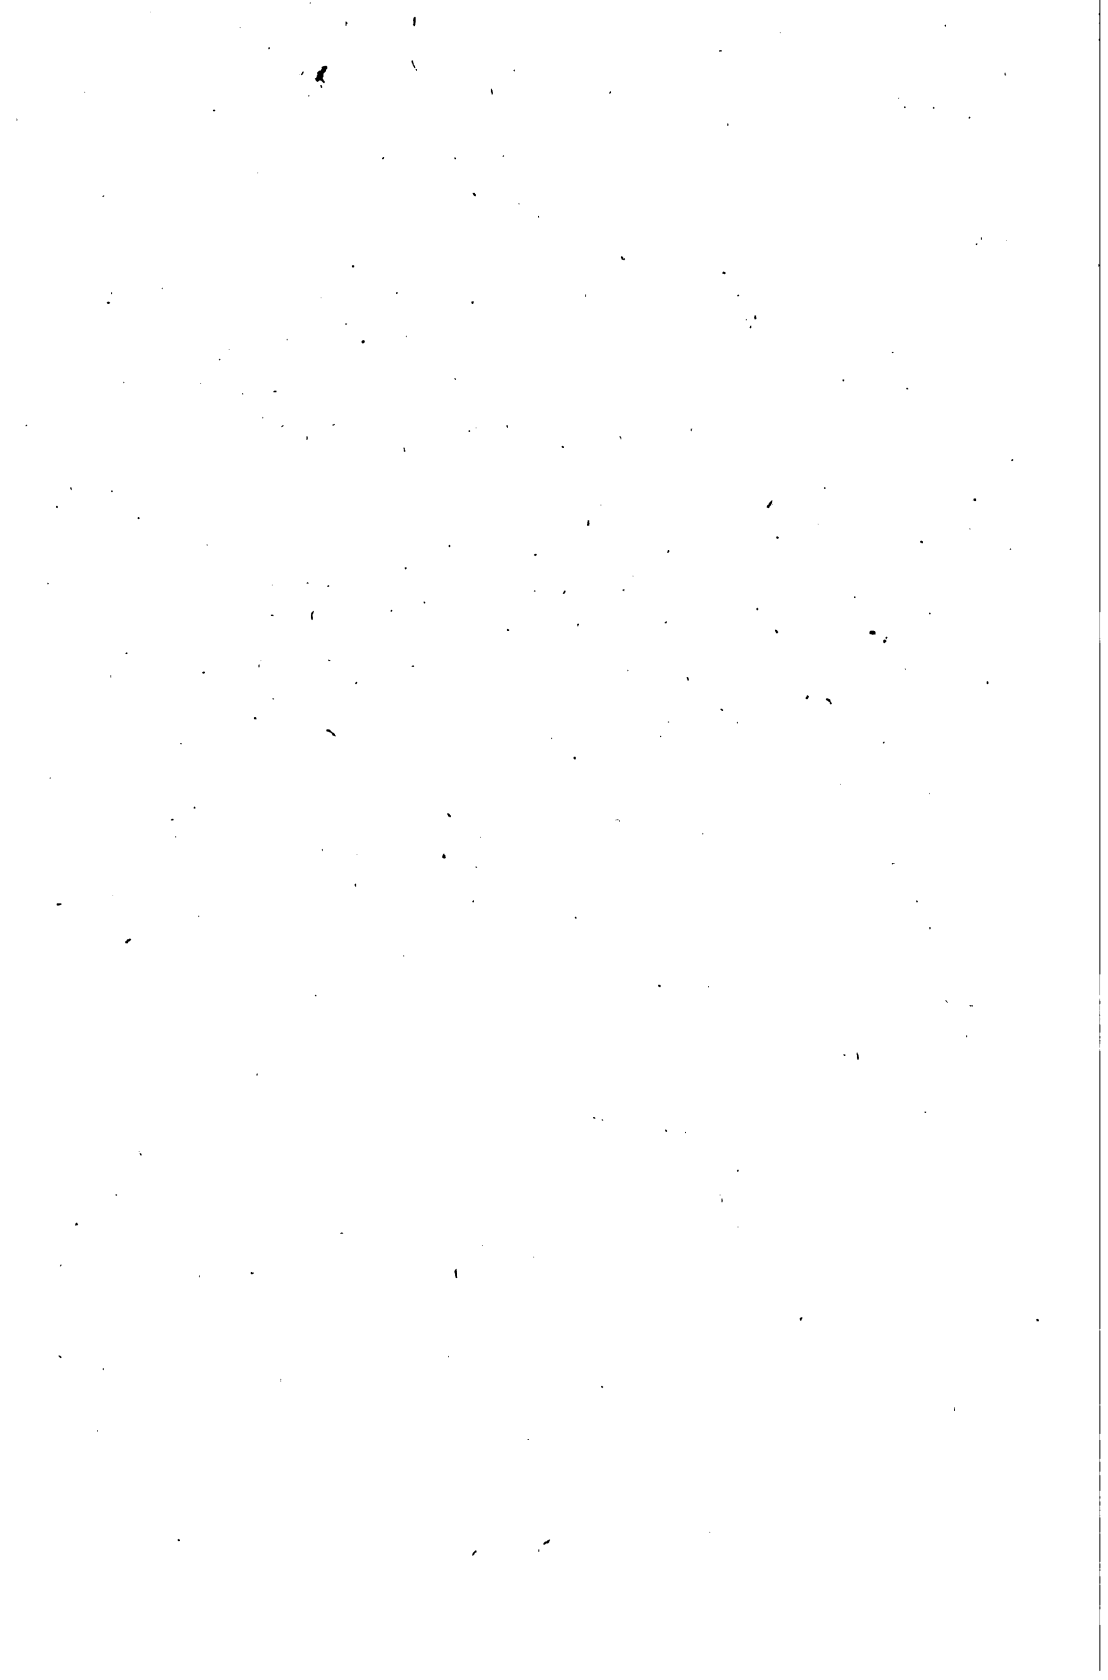

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

GENERAL REVIEW.

HON. WILLIAM T. BAKER, *President, Board of Trade of the City of Chicago:*

SIR:—I have the honor of handing you the thirty-eighth annual report of the Board of Trade of the City of Chicago.

While the record is not all that could be desired, it is nevertheless on the whole a gratifying one and an improvement over that of last year showing that the commerce and industries of the country are steadily moving in the right direction; that capital has been wisely conservative and that general business has been cautiously carried on; that new enterprises have been inaugurated only after careful deliberation; that financial obligations have been voluntarily, persistently and uniformly reduced—all of which has increased that confidence, in the absence of which, prosperity is impossible and progress paralyzed. The process of a general liquidation has been steadily pursued and the financial condition is one of soundness and comparative security. There are fewer threatening evils in the commercial world than for several years. The one cause of uncertainty is that with regard to national currency legislation. Faith must not be wanting in the country's medium of exchange and the fact must not be disregarded that mediums of exchange and standards of value do not find their origin in law but in the necessities and demands of trade and commerce. Commerce, in the standards of exchange which it has set up, has been superior to legislative action.

Commercial and monetary laws which have been maintained are only those which were the unwritten laws of trade and commerce. The underlying, controlling and essential principles of trade were not established by legislative bodies or by kingly edicts; they were proclaimed by those customs which equity in exchange of products of labor had enunciated and were founded upon the principle that "value knows its own laws and follows them in spite of decrees and penalties."

CROPS OF THE UNITED STATES.

The final official estimates of the yield of the principal cereals, comprising wheat, corn, oats, rye and barley, aggregated 3,556,967,878 bushels, raised on 149,191,886 acres, valued at \$987,856,839, as against 2,423,202,476 bushels, 129,603,640 acres and \$1,035,067,710, respectively, in the year 1894. That which is most noticeable in these totals is, that while the yield was 1,133,765,402 bushels more in 1895 than in 1894, the valuation was \$47,210,871 less. There was an increase in the quantity of wheat raised of about 7,000,000 bushels; of corn, about 938,360,000 bushels and of oats, about 162,407,000 bushels. The barley acreage of 1895 exceeded that of any previous year, and with the largest yield per acre in a quarter of a century, produced a crop 11 per cent. above its highest predecessor—that of 1889.

The yield of hay aggregated 47,078,541 tons, grown on 44,206,453 acres, valued at \$393,185,615; the crop of 1894 was 54,874,408 tons, produced on 48,321,272 acres and valued at \$468,578,321. The crop of potatoes in 1895 was 126,450,032 bushels greater than in 1894, aggregating 297,237,370 bushels; the valuation, however, was \$12,541,886.00 less.

The following statement shows the wheat-producing portions of the world, and the months of their respective harvests:

January—Australia, Argentine, Chili, and New Zealand.

February and March—East India and Upper Egypt.

April—Asia Minor, Cuba, Cyprus, India, Lower Egypt, Mexico, Persia and Syria.

May—Algeria, Central Asia, China, Florida, Japan, Morocco and Texas.

June—Alabama, Arkansas, California, Carolina, Colorado, Georgia, Greece, Italy, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Oregon, Portugal, South of France, Spain, Tennessee, Turkey, Utah and Virginia.

July—Austro-Hungary, Bulgaria, France, Germany, Illinois, Indiana, Iowa, Michigan, Minnesota, New York, Nebraska, Ohio, Roumania, South of Russia, Switzerland, South of England, Upper Canada and New England.

August—Belgium, Columbia, Denmark, Great Britain, Holland, Lower Canada, Manitoba, Poland, North and South Dakota.

September and October—Norway, North of Russia, Scotland and Sweden.

November—Peru and South Africa.

December—Burmah.

The following report of the chief crops of the country is furnished by the United States Agricultural Department:

The average farm price of corn, rye, oats, barley, buckwheat and potatoes was lower in 1895 than in any of the other years covered by the table; and in no year since 1880 was corn so low as in 1895. The nearest approach to the last figure was reached in 1889, when a phenomenal crop followed the very large one of 1888, making the production for the two years over 4,100,000,000 bushels, a larger product than has ever been gathered in two consecutive years.

The price of wheat was 1.8 cents lower in 1894 and 2.9 cents higher in 1893 than in 1895, but the average for these three years is much lower than the price for any of the years from 1880 to 1892, inclusive. The high price (83.9 cents per bushel) for the phenomenal crop-year 1891, is explained by the coincidence of the great harvest of the United States that year with a marked deficiency in Europe. It will be noticed that the price of rye that year was much higher than in any other year covered by the table, as might have been expected in view of the scanty crops in large rye-consuming countries, such as Germany and Russia. The latter country has usually an ample surplus of this grain, which may be drawn upon to supply deficiencies throughout Europe, but in 1891 the supply had to be sought elsewhere.

The difference between the prices of oats in 1895 and 1894 is $12\frac{1}{2}$ cents, a decline of nearly 39 per cent. This is not accounted for by the increased harvest in 1895, for the crop of 1894, amounting to 662,086,928 bushels, had been exceeded only three times in our previous history; but in that year the large crop of oats coincided with the smallest corn crop since 1881; and since the two grains are to a considerable extent mutually supplementary, the scarcity of the one had a great effect in keeping up the price of the other.

The low price of barley coincides with a crop exceeding the largest previous record—that of 1893—by 17,203,249 bushels. The crops for the years from 1889 to 1892, inclusive, were not estimated by the department, but that of 1889, as reported in the Abstract of the Eleventh Census, was next in magnitude to that of 1895, amounting to 78,332,976 bushels; and the price for that

year will be seen to have been exceptionally low. For the five years previous to 1889, the crops had been comparatively uniform in magnitude, the smallest—that of 1887—amounting to 56,812,000, and the largest—that of 1888—to 63,884,000 bushels. It may be incidentally noted that in that five-year period, the year of largest production was also the year of highest price. The prices for 1884 and 1885 were 49 and 56 cents, respectively.

We have seen that buckwheat is one of the products whose price was lower in 1895 than in any other year, and a comparison going back to 1871 shows that it is in fact the lowest price within a quarter of a century. The crop is also the largest on record within that time. The crop most nearly approaching that of 1895 was that of 1880, which amounted to 14,617,535 bushels. The price for the same year was 59.4 cents per bushel. The smallest crop in the last twenty-five years was that of 1883, which amounted to 7,668,954 bushels. The price for that year was 82 cents, a figure only exceeded in 1871, 1872 and 1881, which were also years of exceptionally small production. The highest price (86.5 cents) was that of 1881. The crop of that year was larger than that of any other in which the price exceeded 80 cents per bushel ; but 1881 was a year of small production for cereals in general and also for potatoes.

The potato crop of 1895 was unprecedented in magnitude, and the price also unprecedentedly low. Indeed, the fall in the latter seems out of proportion to the surplus, but the production of an effect seemingly disproportioned to its cause in such cases is a phenomenon that has often been noted by students of the movements of prices. Especially is this phenomenon likely to present itself when the commodity of which the surplus exists is a comparatively perishable one like potatoes.

Passing over the price of hay, which presents no exceptional feature, the gratifying increase in the price of cotton, as compared with the extremely low figures of 1894, is noteworthy. The final figures as to the crop of that staple are not yet ready for publication, but preliminary returns indicate a crop hardly over two-thirds as large as that of 1894.

The price of tobacco varies very slightly from that of 1894, being one-tenth of a cent per pound higher. The figures on production will appear in the next monthly report.

Table showing final estimates of the average farm price of various agricultural products, December 1, 1895, together with the acreage sown to winter wheat as compared with the area harvested in 1895, and the average condition of winter wheat and winter rye.

States and Territories.	Corn, per bushel.	Wheat, per bushel.	Rye, per bushel.	Oats, per bushel.	Barley, per bushel.	Buckwheat, per bushel.	Potatoes, Irish, per bush.	Potatoes, sweet, per bush.	Hay, per ton.	Cotton, per pound.	Leaf tobacco, per pound.	Area sown compared with area harvested in 1894.		Average condition December 1, 1895.		Winter rye, average condition December 1, 1895.

WINTER WHEAT, CROP OF 1896.

According to the preliminary returns made December 1, the area sown in winter wheat exceeds that of 1895 by 4.6 per cent. There is a general increase in the Lake States and the Eastern Mississippi Valley, also in Kansas, amounting to 20 per cent. There is a slight decline along the Atlantic and Gulf coasts. Utah and Oregon show a decrease of one-fourth, while Idaho, Washington and California show additions of 8, 12 and 3 per cent., respectively, to last year's area.

The increase of area in New York is explained by a sowing of wheat on land where grass had failed. In the newer Western States the progress of settlement, although not mentioned by correspondents, has probably figured to a greater or less extent as a cause of the increased winter wheat area in Kansas and some of the other Western States this season ; but in some counties a favorable condition of the soil has encouraged the sowing of increased areas, while in others an unpromising appearance in the part first sown has led to additional sowing when more favorable conditions were presented.

Drought at sowing times, the low price of wheat, chinch bugs, and in some cases scarcity of seed, or the substitution of spring for winter wheat, are among the causes assigned where a diminished acreage is reported.

The general average of condition on December 1 was 81.4, against 89 in 1894 and 91.5 in 1893.

The lowest previous average within the ten years, 1886-1895, was 85.3 in 1891 — a figure which was followed by a total crop of nearly 516,000,000 bushels in 1892, the largest but one in our agricultural history. The figures on average condition for the principal winter-wheat States are 92 in New York, 84 in Pennsylvania, 74 in Maryland, 73 in Virginia, 93 in Texas, 91 in Tennessee, 80 in Kentucky, 74 in Ohio, 79 in Michigan, 80 in Indiana, 79 in Illinois, 76 in Missouri and 80 in Kansas.

This exceptionally low condition is chiefly due to the widespread drought, which postponed the sowing on a large part of the winter-wheat area and retarded the germination and growth of much that was sown earlier. On a considerable area the crop was practically a failure, though a part of this area was afterwards

resown under more favorable conditions. During November there were copious rains over the States in which winter wheat is most extensively grown, but the previous drought had left the plant in but a poor condition to meet the chances of an unfavorable winter. Much of the young grain had attained but a small growth before the cold weather came on, and while the plant may have seemed healthy, many correspondents reported it as looking feeble or delicate.

At the beginning of December, there was some snow over the Lake and Upper Mississippi and Missouri basins, but except in Michigan it was only on insignificant areas that its depth amounted to three inches. During the greater part of the month, however, the winter-wheat region remained practically uncovered.

There was some local injury from frosts and in a few localities from Ohio westward to Kansas and Nebraska, chinch bugs or Hessian flies were somewhat troublesome, while grasshoppers were a subject of complaint in reports from Kansas and Nebraska.

A poor condition in December, while not necessarily presaging a poor crop, seriously diminishes the chances of a good one and makes it exceptionally dependent on the prevalence of favorable weather during the winter.

*Average for five years, from 1890 to 1894, inclusive.

In the tables of production and exports of corn and wheat, the fiscal year to which the figures on exports relate are those beginning on July 1, in the years indicated. Thus, the exports set opposite the year 1894 are not for the calendar year 1894, nor for the fiscal year ending June 30, 1894, but for the fiscal year beginning July 1, 1894, and ending June 30, 1895. In this way the exports are placed on the same line with the crop out of which they are mainly drawn. As the fiscal year beginning July 1, 1895, is incomplete, the corresponding space in the column of exports is necessarily left blank. The official figures on exports have, however, been issued for the six months ending on December 31, 1895, and it appears that the corn exported during that period amounted to 38,331,098 bushels, while the wheat, including flour reduced to its wheat equivalent at the rate of $4\frac{1}{2}$ bushels to the barrel, amounted to 65,029,819 bushels. The exports of these two cereals for the corresponding months of the preceding year amounted to 5,904,025 bushels of corn and 76,988,386 bushels of wheat. It will be seen that the exports of corn for the first six months of the current fiscal year amounted to nearly ten million bushels more than those for the whole of the fiscal year preceding. During December, 1895, they amounted to 9,907,570 bushels. It thus

appears that the low price is stimulating the foreign demand, which in turn has a tendency to stiffen the price.

Corn, wheat and oats are by far the most important of our cereal crops. The production and exports of the two former have been given year by year from 1880 to 1895, inclusive. The crop of 1895 is the largest yet gathered, the area being larger than in any preceding year, and the rate of yield exceeding that of any year since 1879.

Our exports of oats (including oatmeal reduced at the rate of 18 pounds to the bushel) rarely exceed 1 per cent. of the total crop, the highest ratio, 2 per cent. for the fiscal year 1889-90, having followed a crop of 751,515,000 bushels in 1889, the largest record until 1895. The export of oatmeal during the six months ending December, 1895, exceeded that of any entire fiscal year since 1886.

FARM ANIMALS.

The number of animals on farms and ranches in the United States in January, 1896, as estimated by the Department of Agriculture, aggregated 146,767,540, including horses, mules, milch cows, oxen and other cattle, sheep and swine, as against 155,555,051 in 1895. The valuation of such animals in 1896 was \$1,727,926,084, as against \$1,819,446,306 upon the corresponding date in 1895. The average price for horses in January, 1896, was \$33.07, as against \$36.29 upon the corresponding date of 1895.

The decline is chiefly accounted for in the sales of very inferior stock, the demand for this description having materially diminished in consequence of the introduction of more efficient and economical motive power in transportation. There has been a decline in values of all kinds, but the only fair prices obtained

were for good roadsters and fancy stock. Very old and inferior animals in some remote sections were killed and used for fertilizing purposes. Even at the low price of grain it did not pay to keep such grades of stock

FOREIGN COMMERCE.

The value of our imports of merchandise during the fiscal year ended June 30, 1895, was \$731,969,965; of gold, \$36,384,760; of silver, \$20,211,179. The value of our exports of merchandise was \$807,538,165; of gold, \$66,468,481; of silver, \$47,295,286. Our total exports and imports amounted in value to \$1,539,508,130 as against \$1,547,135,194 during 1894. The following official statement is submitted, showing the value of provisions, exhibiting the course of commerce in bacon and hams, pork, lard, meat and dairy products since 1859:

Year ending June 30.	HOG PRODUCTS.				Beef Products.	All other Meat Products.	Dairy Products.	Total Value.

The value of our articles of domestic manufactures exported during the fiscal year, amounted to \$183,595,743, as against \$168,927,315 during 1891. Our products of agriculture exported, amounted in value to \$553,210,026 or 69.73 per cent. of the sum of our total exports. The value of our exports of raw cotton amounted to \$204,900,990, as against \$210,869,289 in 1894. The value of our exports of breadstuffs during the year, amounted to

\$114,604,780, as against \$166,777,229 during 1894. Our exports of wheat aggregated 76,102,704 bushels and amounted in value to \$43,805,663, as against 88,415,230 bushels and \$59,407,041, respectively, in 1894. Our exports of wheat flour during the year aggregated 15,268,892 barrels and amounted in value to \$51,651,928 as against 16,859,533 barrels and \$69,271,770, respectively, in 1894. Of our volume of wheat exported during 1895, 54,373,341 bushels were shipped to the United Kingdom, 5,128,509 bushels to Belgium, 4,019,510 bushels to the Netherlands and 3,910,712 bushels to the Dominion of Canada. Of the number of barrels of flour exported, 8,825,277 barrels were shipped to the United Kingdom, 792,134 barrels to the Netherlands, 787,318 to Hongkong and 775,425 to Brazil.

Of the total value of our exports for the fiscal year but \$62,277,581 was exported in American vessels, while \$695,357,830 was exported in foreign vessels. 11.7 per cent. of the total value of our foreign trade, including both imports and exports, was carried in American vessels; the value carried by foreign vessels being \$1,285,896,192 and that carried in American vessels \$170,507,196. 8.2 per cent. of the value of our exports and 15.5 per cent. of the value of our imports was carried in American vessels.

Consul Campbell, at Newcastle-on-Tyne, writes to the State Department that in connection with the discussion of the present small participation of the American flag in the carrying abroad of American products it may be of interest to note the experience of that consular district alone during the past year. At Newcastle and its agencies at Hartlepool, Sunderland and Carlisle, 437 consular bills of health were issued to foreign vessels bound to the United States, mostly in ballast and bound to ports all the way from Boston to Galveston in pursuit of American cargoes. Of these, 402 were British, 35 were under various continental flags and, with the exception of eleven sailing vessels, all were steamers averaging over 2,500 tons each. During the same period but a single American vessel, a sailing ship of 1,572 tons, arrived and departed in the Tyne consular district.

The exports of our manufactures during the past year have been the largest on record, and under commercial and financial conditions of an unfavorable character and in the face of a compe-

tition encouraged and sustained by special privileges and concessions.

As our exports of grain from the port of Newport News, Va., are assuming a new importance not only with reference to the trade but have become of interest to transportation lines, I would state that for the fiscal year ended June 30, 1895, there was exported from that port 3,393,625 bushels of corn, valued at \$1,754,781; 3,142 barrels of corn meal, valued at \$7,945; 2,973,974 bushels of wheat, valued at \$1,756,183, and 1,131,040 barrels of flour, valued at \$3,732,696; and for the year ended December 31, 1895, 1,274,045 barrels of flour, 1,185,400 bushels of wheat, 4,866,335 bushels of corn, 104,982 bushels of oats and 49,535 bushels of barley.

The export trade of the United States will grow in value and importance as our exportation of manufactured articles, of superior quality, is increased. The exportation of raw material is not likely to materially increase the national wealth unless that material is peculiar to the exporting country, or unless it is a product whose supply is not equal to the demand. Most of the raw material exported from the United States is agricultural and is brought into competition with low priced and degraded labor, and is sold at a small profit. Manufactured goods, especially in a country whose citizenship is ambitious, whose educational privileges are superior, whose artisans and workmen are experienced and proficient, command a much higher relative price than does raw material, because not brought into competition with the products of an unintelligent and degraded labor, a labor without civilized requirements.

In view of many inquiries relating to the rates of customs duties leviable in trans-Atlantic countries on cereals and flour, it is deemed advisable to publish in the following tabular form the tariff rates that now obtain in European countries on these articles, both in the original measures and in their United States equivalents.

The conversion from foreign into United States measures has been made at the rate of 60 pounds per bushel of wheat, 56 pounds per bushel of rye and corn (maize); 48 pounds per bushel of barley, 32 pounds per bushel of oats, 196 pounds per barrel of wheat flour or corn meal.

TARIFF RATES IN EUROPEAN COUNTRIES.

IMMIGRATION.

The number of immigrants arrived during the year was 279,948, of which 31,948 came from England, 47,972 from Ireland, 36,961 from Italy, 36,351 from Germany, 33,462 from Austria-Hungary, 32,053 from Russia, 15,683 from Sweden, 5,888 from Scotland. In the official immigration statistics published after July 1, 1895, arrivals from British North America and Mexico are not included. Upon page 151 of this volume may be found a statement of the number of alien passengers arrived in the United States from 1820 to 1895, inclusive.

The subject of immigration is properly receiving the thoughtful attention of congress; and the country is beginning to realize that many of the disturbances, especially in our large cities, which have threatened the public peace and endangered human life, have been caused by a class who never should have been admitted to the privileges of American citizenship—a debased and constitutionally riotous class, with crude and barbarous conceptions of liberty under a republican form of government—a lawless, improvident and indolent class, impatient of all restrictions and breeders of discontent and mischief. The public attention has also been directed to the special importance of not admitting to our shores the contagiously diseased, the imbecile, the insane and the pauper. Contract laborers also should be excluded, for not only must the physical and moral quality of citizenship be maintained but the requirements of civilized labor must not be in any manner curtailed. No one who can not and will not contribute, in some measure, to the public welfare should be landed here. Our immigration laws should not be of such a character as to increase the number of the non-productive or of those who would deteriorate the quality of citizenship, tend to subvert the national security, or to impair the body politic. This Board has deemed this subject of sufficient importance to introduce a resolution at the annual meeting of the National Board of Trade urging upon congress such legislation as will exclude all undesirable persons from participation in the unequalled advantages of American citizenship.

During the year ended June 30, 1895, there were debarred from entering the United States, 3 idiots, 5 insane persons, 1,701 paupers, 3 convicts, 682 contract laborers, comprising 2,282 males and 112 females.

The receipts of grain, and of flour in its grain equivalent,

during the year 1895 aggregated 189,432,819 bushels, against 187,553,469 bushels in 1894, 246,972,966 bushels in 1893, and 255,832,556 bushels in 1892; the shipments during the year aggregated 171,464,137 bushels, against 148,638,822 bushels in 1894, 198,791,216 bushels in 1893, and 216,182,008 bushels in 1892.

The receipts of wheat during the year aggregated 20,637,642 bushels, against 25,665,902 bushels in 1894, 35,355,101 bushels in 1893 and 50,234,556 bushels in 1892; the shipments during the year aggregated 22,775,780 bushels, against 18,213,443 in 1894, 24,715,738 bushels in 1893 and 43,833,795 bushels in 1892. Of the quantity *shipped during the year 1895, 13,258,440 bushels went by the lakes. A significant feature of the wheat shipments during the past year was that 1,112,000 bushels were shipped via the Chicago & Alton Railroad, showing that an unusual demand existed throughout the year from winter wheat milling regions and emphasizing the fact that reserves of winter wheat in farmers' hands were and are exceedingly small. Our yield of winter wheat during 1895 was 261,242,184 bushels, against 329,290,230 bushels in 1894. The crop of spring wheat during the year aggregated 205,860,873 bushels, which was by far the largest crop in eleven years, excepting that raised in 1891.

On page 200 may be seen a statement of spring and winter wheat crops for a series of years, as estimated by the United States Agricultural Department. The diversification of farming industries, the increase of manufacturing and of mechanical employments, incident to regions where the density of population has increased, account in part for the reduction in the volume of the crop of winter wheat. The acreage sown to winter wheat in 1895 was about 1,000,000 acres less than that in 1894. The diversification of crops is much less in those regions which have but recently been occupied than in the comparatively older farming communities. As the farmer becomes prosperous, his wants increase and his ability to supply those wants gives rise to an increase in the variety of employments and a larger division of labor. Large belts of our winter wheat regions are becoming and have become so prosperous that they are not so much shut up to wheat-raising as formerly; and when wheat-growing does not yield a reasonable profit, attention and effort are turned in other

* NOTE.—Commercial usage has applied this word to the outward movement of grain, both by water and by rail.

directions: a wider market is now at hand, and new enterprises call for new efforts and a greater division of labor.

The receipt of corn during the year aggregated 59,527,718 bushels, against 64,951,815 bushels in 1894, 91,255,154 bushels in 1893, and 78,510,385 bushels in 1892. The largest quantity brought in by any railroad was by the Chicago, Rock Island & Pacific Railway, and was 18,380,150 bushels. The Chicago, Burlington & Quincy and the Chicago & Alton each delivered in Chicago about 9,000,000 bushels.

The sections of the country into which these great traffic systems run, substantially define the location of the great corn belt in which is included the great states of Iowa, Illinois, Missouri, Kansas and Nebraska. Our receipts from these states during the coming year are likely to be enormous, as last year their combined corn production aggregated about 1,122 million bushels, or more than one-half the entire crop of the United States. Our corn receipts were many times greater than those of any other market. Peoria is the next largest corn market, having received last year 15,596,695 bushels. St. Louis received 8,779,290 bushels and Toledo 6,645,204 bushels. Our stock in store at the close of the year, was 911,612 bushels, as against 2,383,912 bushels the year previous. Detailed statement by months and by routes may be seen on page 10 of my report.

The shipments during the year aggregated 59,964,265 bushels, against 54,528,482 bushels in 1894, 78,919,781 bushels in 1893 and 66,104,220 bushels in 1892.

The receipts of oats during the year aggregated 79,890,792 bushels, against 63,144,885 bushels in 1894, 84,289,886 bushels in 1893 and 79,827,985 bushels in 1892; the shipments during the year aggregated 66,839,596 bushels, against 50,376,089 bushels in 1894, 67,129,119 bushels in 1893 and 67,332,322 bushels in 1892. On pages 20 and 21 may be seen statements showing receipts and shipments for a long series of years.

The number of cars of grain inspected during the year amounted to 222,960, against 204,408 in 1894; the quantity of grain inspected, received by lake and canal, was 4,294,138 bushels, against 2,270,931 bushels in 1894; the largest number of cars of grain inspected in any month was 33,942, inspected in October and consisted chiefly of corn.

The week of the largest receipts of flour and grain was that

which ended on October 12th, when 8,487,338 bushels were received, 4,292,740 bushels being of oats; the week of the largest receipt of wheat was that which ended November 2d, when 1,788,585 bushels were received; and the week of the largest receipt of corn was that which ended June 1st, when 2,762,759 bushels were received.

The week of the largest shipments of flour and grain was that which ended on April 27th, when 6,867,807 bushels were shipped, 2,479,861 bushels being of wheat and 2,514,897 bushels of corn.

The volume of grain stored in warehouses of class A, located in the City of Chicago, at the close of the year, aggregated 22,920,903 bushels, against 30,704,048 bushels upon the corresponding day in 1894. The capacity of grain warehouses declared regular warehouses under the rules of this Board, is 27,750,000 bushels.

The receipts of grass seed, comprising timothy, clover, hungarian millet, etc., during the year, aggregated 63,868,526 pounds, and shipments 65,567,528 pounds, as against 47,524,961 pounds and 66,139,009 pounds, respectively, during the year 1894.

The receipts of lumber during the year aggregated 1,638,130,000 feet and the shipments 773,983,000 feet, against 1,562,527,000 feet and 632,069,000 feet, respectively, during the year 1894; of shingles were received 352,313,000 feet and shipped 298,835,000 feet. Detailed statements showing the movement of this interest for a series of years may be seen on page 96 of this volume.

The receipts of butter during the year aggregated 185,452,991 pounds and shipments 176,846,168 pounds, as against 144,868,216 pounds and 155,062,053 pounds, respectively, during the year 1894.

The receipts of cheese during the year aggregated 59,012,937 pounds and shipments 52,226,151 pounds, as against 53,622,983 pounds and 56,062,563 pounds, respectively, during the year 1894. On pages 98 and 99 of this report may be found full statements showing receipts and shipments by months and routes, also prices by grades.

Our receipts of lard during the year, aggregated 53,936,324 pounds, and shipments 387,437,699 pounds, as against 33,177,799 pounds, and 400,211,462 pounds, respectively, during the year preceding.

Of meats other than barreled pork, we received during the year 172,203,523 pounds, and shipped 698,210,341 pounds, as against 139,003,374 pounds and 570,276,662 pounds, respectively, during the year immediately preceding. The month of heaviest shipments, was that of October, when 70,821,508 pounds were shipped; but the shipments throughout the year were quite uniform in volume, showing a very steady demand and also showing that the facilities for shipping and for insuring the product in good condition, at point of destination, are fully provided. Heavy shipments of these meats in various styles of packing were made to the south, the Pittsburgh, Cincinnati, Chicago & St. Louis Railway having taken over 106,000,000 pounds this past year.

On page 41 of this report may be seen carefully arranged systematic statements, showing names of railroads on which received and by which shipped, also may be seen a statement of receipts and shipments by months.

The receipts of flaxseed during the year aggregated 8,525,237 bushels, and the shipments 4,726,818 bushels, as against 5,102,668 bushels and 2,353,757 bushels, respectively, during the year 1894. The bulk of the receipts occurred during the months of September, October, November and December.

The receipts of live stock during the year comprised 2,588,558 cattle, 3,406,739 sheep, 168,740 calves, 113,193 horses and 7,885,283 hogs, aggregating 14,162,513 animals valued at \$200,584,380, received in 270,816 cars. The valuation of our receipts of live stock from 1866 to 1895, inclusive, amounts to \$4,379,532,511. The receipts of sheep in 1895 were the largest in any year, viz: 3,406,739; during the month of October we received 393,820 and during the week ended October 12, we received 98,163. On the 11th of February our receipts of hogs numbered 74,551, which is the largest number ever received in a day. During the last thirty years Chicago received 234,732,019 head of live stock, comprising 49,214,663 cattle, 1,669,422 calves, 152,779,500 hogs, 30,080,121 sheep and 988,313 horses.

Elsewhere in this volume may be found detailed statements of receipts and shipments of live stock by months and by railroads, for which I am indebted to Mr. J. C. Denison, Secretary of the Union Stock Yards & Transit Company. The report of this company establishes this as the leading live stock market of the world and one most thoroughly equipped in every respect, having

a capacity for 50,000 cattle, 200,000 hogs, 30,000 sheep and 5,000 horses.

During the year Chicago received 109,351,714 pounds of dressed beef, and shipped 910,339,175 pounds, as against 136,476,783 pounds and 1,080,053,993 pounds, respectively, during the year 1894.

The population of Chicago is about 1,800,000; its bonded debt, \$17,188,950; its valuation of personal property, \$50,977,983; its assessed real estate valuation, \$192,498,842; the amount of its sinking fund, \$1,090,672.21. During the year 1895, 8,633 buildings were erected, valued at \$35,010,043.

The number of vessels arrived during the year at the port of Chicago was 9,212, representing a tonnage of 6,329,702 tons, and the number cleared, 9,363, representing a tonnage of 6,392,497 tons. Upon pages 133 to 137, inclusive, of this report may be seen statistics upon this subject in a variety of forms with respect to the principal ports of entry of this and of other countries.

WHEAT.

The wheat market during the year was of so irregular, exceptional and eccentric a character as renders it quite impossible to present any accurately comparative statement of prices. The lowest price during the year, obtained in the month of January, when the range was from 48½ to 55 cents for the regular contract quality. The market during the early months of the year was uneventful. In the month of April was realized, that supplies both foreign and domestic had become materially reduced, which imparted confidence to the market.

Soon thereafter there were serious apprehensions of damage to winter wheat caused by dry weather. Under such circumstances, a report that the weather in France was exceedingly unfavorable imparted to the market a very decided strength, and to "shorts," a nervousness which found expression in many and heavy purchasing orders. This was soon followed by numerous orders to buy from the country. The market responded to these unaccustomed influences and prices rallied from 53½ to 63½ cents per bushel during the month. During the month of April sales were made for May delivery at 64½ cents per bushel.

The reports of damage to winter wheat were confirmed and an anxiety on the part of millers in the winter wheat region became

very forcibly apparent in the general market; this gave an impetus to the country buying and the market was intensely active. Commission houses were actually overrun with orders and many firms were obliged to organize a night force to take care of their business. Under these conditions the market was extremely sensitive to bull news, and reports of damage from whatever cause were credibly received. The month of May was wild with excitement and with hardly a reaction. Prices during that month steadily and rapidly advanced to $81\frac{1}{2}$ cents for cash No. 2, and some buying was done at 82 cents to close up short sales. As was natural, the market during the month of June was a reactionary one.

It was inevitable that such intense excitement as prevailed in the month of May should in some degree subside, but prices were steadily maintained until about the middle of the month, from which time they declined uniformly, though not violently, throughout the remainder of the month. Upon the 29th of June sales were made at from $69\frac{1}{2}$ to $70\frac{1}{2}$ cents. July brought no reviving influences to the market, for while the damage to winter wheat was serious the crop of spring wheat was enormous. The market during July was devoid of animation, and without any sustaining elements prices declined until sales were made at $61\frac{1}{8}$ cents; from this point prices improved steadily and reached $71\frac{1}{2}$ cents on the 29th; from this date prices sagged off to 69 cents on the 31st.

During the month of August prices fluctuated between 59 and $67\frac{1}{2}$ cents. The trade during the entire month was dull and absolutely without any new developments. September sales were made at still lower prices, touching $55\frac{1}{8}$ cents on the 12th. Towards the close a slight reaction set in, and on the 30th sales were effected at $62\frac{1}{4}$ cents per bushel. The business during October was so inactive that the range of prices was almost unprecedentedly narrow. During the month prices ranged from $58\frac{3}{8}$ to $61\frac{3}{8}$, and with the exception of the first three days of that month the range of prices was only from $58\frac{3}{8}$ to $59\frac{1}{8}$ cents.

The market in November was a declining one and without any accession of the buying interest.

Sales were made as low as $55\frac{1}{4}$ cents and as high as $58\frac{1}{4}$ cents. The demand during December, largely from winter wheat regions, gave some animation to the cash market, and a fair business was transacted at from 54 to $59\frac{1}{2}$ cents per bushel. The main features

of the year in this market were as follows : Damage to winter wheat ; depleted stocks in April ; unfavorable weather, affecting crops in France ; demand from Illinois, Indiana, Ohio, Michigan, Kentucky, Tennessee, Pennsylvania, Kansas City and St. Louis ; subsequently the contradiction of news of damage to spring wheat ; an indifferent foreign demand and a lack of speculation.

The following is a statement of the extreme prices each year for thirty-one years, indicating the month in which such prices obtained :

Year.	Months the lowest prices were reached.	Range for the entire year.	Months the highest prices were reached.
1865	December.....	85 (a 1 55	January.
1866	February.....	78 (a 2 03	November.
1867	August.....	1 55 (a 2 85	May.
1868	November.....	1 04 (a 2 20	July.
1869	December.....	76 (a 2 47	August.

1895	January.....	48 (a 81 1/2	May.

CORN.

The crop of corn in 1895 was the largest ever harvested and was of superior quality. More than 2,151,000,000 bushels were harvested, Iowa producing 298,502,650 bushels and Illinois 255,136,554 bushels. On account of the low prices of this cereal and the inexpensiveness of holding it, a very large business was done in cribbing. Elsewhere is recorded the daily prices for the year.

During the month of February, prices varied from $40\frac{3}{8}$ to $43\frac{3}{8}$ cents per bushel, with the major part of the sales at about 42 cents. The May options during this month sold as high as $45\frac{1}{8}$ cents. Cold weather checked deliveries and imparted strength to the cash market. Prices at the opening of the year ranged from $44\frac{3}{8}$ to $45\frac{3}{8}$ cents per bushel. The highest price obtained in January was 46 cents and the lowest $40\frac{1}{2}$ cents per bushel. On page 12 may be seen a statement of the range of prices during each month from 1873 to 1895, inclusive, and on page 11 may be found a statement of prices each week during the year. During the month of March we had a well sustained market, sales ranging from $42\frac{1}{8}$ to $45\frac{1}{4}$ cents. In April the demand was urgent and was aided by improvement in the wheat market. During the latter part of that month sales were made with great uniformity at about $47\frac{1}{2}$ cents per bushel. The month of May brought an increased demand, derived from an intense and advancing wheat market, and sales were made at from $46\frac{3}{4}$ to $54\frac{1}{2}$ cents per bushel.

Sympathizing with the reaction which occurred in the wheat market and affected by the flattering crop prospects, prices declined during the month of June, and closed at about 47 cents per bushel. The depression deepened as confirmatory despatches came concerning an enormous yield, and the July market ranged from $41\frac{1}{8}$ to $47\frac{3}{8}$ cents, closing at $42\frac{1}{8}$ cents per bushel. The market during August was still more decidedly in buyers' favor, and sales were made as low as $35\frac{1}{8}$ cents. September, with its brilliant and ripening harvest weather, marked prices down to $30\frac{1}{2}$ cents per bushel for No. 2, or the standard grade; 36 cents was the highest price reached that month and that for a brief time. The weakness and decline in prices continued into October, when 28 cents was quoted on the 11th of that month. During the month of November there was nothing to stimulate buying, and in the absence of any considerable demand prices kept down and within the narrow range of from $26\frac{3}{8}$ to $29\frac{1}{2}$ cents, with closing sales at $26\frac{3}{8}$ cents per bushel. During the month of December the market was a heavy one and much of the time was actually devoid of buyers. The price on the last day of the year was about $25\frac{1}{2}$ cents, as against $45\frac{3}{8}$ cents on the corresponding date of 1894. At the beginning of the year the quantity in store aggregated 3,097,-978 bushels, as against 2,996,189 bushels in 1894, and 5,358,518 bushels in 1893. The quantity of corn received during the year

aggregated 59,527,718 bushels, as against 64,951,815 bushels in 1894, and 91,255,154 bushels in 1893.

Shipments during the year aggregated 59,964,265 bushels, as against 54,528,482 bushels in 1894, and 78,919,781 bushels in 1893. The visible supply of corn in the United States and Canada on January 5th, 1895, was 10,672,000 bushels, and on December 28th following 5,817,000 bushels, as against 9,526,000 bushels and 9,630,000 bushels, respectively, in 1894.

The following table shows the extreme prices in each year for thirty-one years, indicating the month in which such prices were obtained:

Year.	Months the lowest prices were reached.	Range for the entire year.	Months the highest prices were reached.
1865.....	December	38 @ 88	January and February.
1866.....	February	33 $\frac{3}{4}$ @ 1 00	November.
1867.....	March	56 $\frac{3}{4}$ @ 1 12	October.
1868.....	December	52 @ 1 02 $\frac{1}{2}$	August.
1869.....	January	44 @ 97 $\frac{1}{2}$	August.
1870.....	December	45 @ 94 $\frac{1}{2}$	May.
1871.....	December	39 $\frac{1}{2}$ @ 56 $\frac{1}{2}$	March and May.
1872.....	October.....	29 $\frac{1}{2}$ @ 48 $\frac{3}{8}$	May.
1873.....	June.....	27 @ 51 $\frac{1}{4}$	December
1874.....	January	49 @ 86	September.
1875.....	December	45 $\frac{1}{2}$ @ 76 $\frac{1}{2}$	May and July.
1876.....	February	38 $\frac{3}{8}$ @ 49	May.
1877.....	March	37 $\frac{3}{8}$ @ 58	April.
1878.....	December	29 $\frac{3}{8}$ @ 43 $\frac{3}{8}$	March.
1879.....	January	29 $\frac{3}{8}$ @ 49	October.
1880.....	April	31 $\frac{1}{2}$ @ 43 $\frac{3}{4}$	November.
1881.....	February	35 $\frac{3}{4}$ @ 76 $\frac{3}{8}$	October.
1882.....	December	79 $\frac{1}{4}$ @ 81 $\frac{1}{2}$	July.
1883.....	October	46 @ 70	January.
1884.....	December	34 $\frac{1}{2}$ @ 87	September.
1885.....	January	34 $\frac{1}{4}$ @ 49	April and May.
1886.....	October.....	33 $\frac{3}{8}$ @ 45	July.
1887.....	February	33 @ 51 $\frac{1}{8}$	December.
1888.....	December	33 $\frac{1}{2}$ @ 60	May.
1889.....	December	29 $\frac{1}{4}$ @ 60	November.
1890.....	February	27 $\frac{1}{4}$ @ 54 $\frac{1}{4}$	November.
1891.....	December	39 $\frac{1}{2}$ @ 80	November.
1892.....	January	37 $\frac{1}{2}$ @ 1 00	May.
1893.....	December	34 $\frac{1}{8}$ @ 44 $\frac{7}{8}$	May.
1894.....	February	33 $\frac{1}{4}$ @ 59 $\frac{1}{2}$	August.
1895.....	December.....	24 $\frac{7}{8}$ @ 54 $\frac{3}{4}$	May.

OATS.

The market for oats was without any special feature during the first half of the year. Abundant stocks and large holdings prevented enterprise in the market and the movement was simply one of daily demand and supply. Prices indeed were low, but there was

a constant liability that two or three million bushels might be thrown upon the market at once, and consequently no intelligent forecast of the future market could be made. Under these circumstances speculation to any considerable extent was impossible. In the month of May large shipments went out by lake at presumably low rates of freight. This relieved the situation and materially changed the general conditions. At this time many who had realized substantial profits in wheat turned their attention to oats. Unfavorable crop prospects in Indiana, Ohio and Illinois stimulated general buying and brought about an advance of about 3 cents per bushel. Soon, however, the great State of Iowa announced a crop of about 183,000,000 bushels, and the total crop of the country promised to be about 825,000,000 bushels, by far the largest crop recorded. This very abundant prospective supply did not drive buyers from the market. The enterprise of the trade soon found expression in obtaining such rates of freight as made liberal shipments by lake to Buffalo possible, and heavy lines were moved at from $\frac{1}{4}$ of a cent to 1 cent a bushel.

The quantity in store at the beginning of the year was 1,350,265 bushels, as against 648,335 bushels upon the corresponding date in 1894. The quantity in store at the close of the year was 544,268 bushels, as against 1,676 006 bushels upon the corresponding date in 1894. The quantity of oats received during the year aggregated 79,890,792 bushels, and the quantity shipped 66,839,596 bushels, as against 63,144,885 bushels and 50,376,089 bushels, respectively, during 1894.

The market during the latter part of the year admitted of some export business, notably from the port of Newport News. Our receipts during the month of October reached nearly 14,000,000 bushels. Of the quantity received during the year 21,084,100 bushels came in over the Chicago & Northwestern Railway. On page 13 may be seen a statement of the range of prices for No. 2 oats, by months, from 1879 to 1895, inclusive.

Prices during the month of January varied but a trifle; indeed the market was almost nominal; the lowest price was $27\frac{1}{2}$ and the highest $28\frac{1}{2}$ cents per bushel. February market was without material change either in prices or conditions. The March market was very much the same as that of February, showing at its close a slight improvement. In April this improvement was not sustained, but in May there came a substantial rally and No. 2 cash

sold at $30\frac{1}{2}$ cents per bushel. This advance held until about the middle of June when weakness set in and prices receded, sales at the close being made at 25 cents per bushel.

In July a very decided apathy settled upon the market and speculation withdrew, leaving the bear influence to hold undisputed sway. The price of No. 2 at the close of the month ranged from $22\frac{3}{4}$ to 23 cents per bushel. In August this depression deepened and prices declined to $18\frac{3}{4}$ cents per bushel. Both buyers and holders became discouraged.

In September the market recovered from its stagnation and a very fair trade came to cheer the hearts of holders. Prices during this month ran along very evenly from about 19 cents to $19\frac{1}{2}$ cents per bushel, but in October the strength of the market vanished and prices limped along from $17\frac{1}{2}$ to 18 cents per bushel. The market stiffened at the close of the month and $18\frac{3}{4}$ cents was realized. A few cheering influences came into the market with the month of November, but these were dispelled about the middle of the month and $17\frac{1}{2}$ cents was enough to buy 32 pounds of No. 2 oats on the 30th. The December market was the sickest market in the whole sick year, and $16\frac{3}{4}$ cents bought a bushel of No. 2 oats near the close of the month.

The following is the statement of the extreme prices each year for thirty-one years, indicating the month in which such prices were realized:

Year.	Months the lowest prices were reached.	Range for the entire year.	Months the highest prices were reached.
1865.....	December.....	25 @66	January.
1866.....	February.....	21 $\frac{3}{4}$ @44 $\frac{1}{2}$	November.
1867.....	August.....	38 $\frac{1}{2}$ @90	June.
1868.....	October.....	41 $\frac{1}{2}$ @74	May.
1869.....	October.....	35 $\frac{1}{2}$ @71	July.
1870.....	September.....	32 $\frac{1}{2}$ @53 $\frac{1}{2}$	May.
1871.....	August.....	27 @51 $\frac{1}{2}$	March and April.
1872.....	October and November	20 $\frac{1}{4}$ @43 $\frac{1}{4}$	June.
1873.....	April.....	23 $\frac{3}{4}$ @40 $\frac{5}{8}$	December.
1874.....	August.....	37 $\frac{1}{4}$ @71	July.
1875.....	December.....	29 $\frac{1}{2}$ @64 $\frac{1}{2}$	May.
1876.....	July.....	27 @35	September.
1877.....	August.....	22 @45 $\frac{3}{4}$	May.
1878.....	October.....	18 @72 $\frac{1}{2}$	July.
1879.....	January.....	19 $\frac{1}{2}$ @36 $\frac{3}{4}$	December.
1880.....	August.....	22 $\frac{1}{2}$ @35	January and May.
1881.....	February.....	29 $\frac{1}{2}$ @47 $\frac{3}{4}$	October.
1882.....	September.....	30 $\frac{1}{2}$ @62	July.
1883.....	September.....	25 @43 $\frac{1}{2}$	March.
1884.....	December.....	23 @34 $\frac{1}{4}$	April.
1885.....	September.....	24 $\frac{1}{4}$ @36 $\frac{1}{2}$	April.
1886.....	October.....	22 $\frac{7}{8}$ @35	January.
1887.....	March and April.....	23 $\frac{1}{2}$ @31 $\frac{1}{2}$	December.
1888.....	September.....	23 $\frac{1}{8}$ @38	May.
1889.....	October.....	17 $\frac{3}{4}$ @26 $\frac{1}{8}$	February.
1890.....	February.....	19 $\frac{3}{4}$ @45	November.
1891.....	October.....	26 @56 $\frac{1}{2}$	April.
1892.....	January.....	28 @34 $\frac{5}{8}$	August.
1893.....	July.....	21 $\frac{5}{8}$ @32 $\frac{1}{4}$	May.
1894.....	January.....	26 @50	June.
1895.....	December.....	16 $\frac{5}{8}$ @31 $\frac{1}{2}$	June.

RYE.

The opening prices of rye were from 48 to 50 cents per bushel. The stock in store on the 5th of January was 148,232 bushels, as against 238,017 bushels one year ago. Prices gradually improved under the influence of a uniform demand and a steadily diminishing supply, until 70 cents per bushel was reached in the month of June, while the stock in store ran down to 27,000 bushels. Reports of damage to Russian and German crops imparted a nervousness to the market and sent September rye to 73 $\frac{1}{4}$ cents per bushel. Prices, however, soon weakened and we had a steadily declining market throughout the remainder of the year, closing on December 31st at 32 $\frac{1}{2}$ cents per bushel. Buying on the part of millers and distillers was moderate and not influenced by unfavourable

avorable crop reports. This trade is distinctively conservative in its operations and takes the market as it finds it, not anticipating its character or seeking to forecast its future. Receipts during the year aggregated 1,657,216 bushels and shipments 1,168,252 bushels, as against 1,368,157 bushels and 1,100,558 bushels, respectively, in 1894. The volume of exports for the fiscal year ended June 30th, 1895, aggregated but 9,437 bushels, valued at \$5,340; and for the calendar year 1895, only 1,424 bushels.

Prices ranged from 32 to 70 cents per bushel. The following is a statement of prices for the year, by months, of No. 2 rye:

	Highest.	Lowest.	Average.
January.....	50	48	49
February.....	53½	50	51.5
March.....	55	51	53
April.....	66	54½	60.3
May.....	67	62½	64.8
June.....	70	59½	64.8
July.....	58	46	52
August.....	45	39	42
September.....	40	37	38.5
October.....	41	37	39
November.....	37	35½	36.3
December.....	35¾	32	33.9
Year.....	51.5	46	48.8
1894.....	51	40	46.56
1893.....	60	40	44.77
1892.....	88½	46½	68

BARLEY.

The market for barley was, throughout the year, under depressing influences. The proportion of thin and inferior grades was such as to affect materially the sales of good and superior samples. The low prices which prevailed for oats, prevented favorable sales of the thin and undesirable lots of barley not good enough for malting purposes, and the market was quite at the mercy of the buyer. The most desirable samples came from Minnesota, though a very good quality was raised in Wisconsin. That which was shipped from Iowa was varied in quality and much of it was light in weight and very ordinary. Receipts during the year aggregated 14,194,881 bushels and shipments 9,322,244 bushels, as against 13,418,391 bushels and 7,707,218 bushels, respectively, in 1894. The volume of exports for the fiscal year ended June 30, 1895, aggregated 1,563,754 bushels, valued at \$767,228, as against 5,219,405 in

1894 and 3,035,267 bushels in 1893. The quantity exported during the calendar year aggregated 3,540,921 bushels, valued at \$1,485,038.

Prices at the beginning of the year were from 55 to 56 cents per bushel for No. 2, which were fairly maintained until about the middle of March, from which time they gradually declined until the new crop began to arrive freely, when buyers controlled the market and prices dropped down to 44 cents and subsequently to 38 cents, closing on the 27th of December with sales of the contract grade at 38 cents per bushel.

SEEDS.

The market for timothy seed was quite variable. The supply of seed during the early months of the year was limited, owing to the small crop of 1894; and the high prices which prevailed, curtailed trading so that dealers were disappointed in the spring demand. In April the market became animated and quite a speculative feeling was apparent, which advanced prices to \$6.00 per cental for timothy seed of prime quality. This was the highest price of the year, and was brought about by anxiety, caused by dry weather, and by fears that the new crop would be deficient in volume and of inferior quality. This advance proved too great for the good of the trade, as it caused buyers to hold off to a large extent and made quotations in some degree nominal. Besides, it induced farmers to market their entire supply of seed and to exercise great care that none of the crop should be wasted; hence the supply soon became excessive and prices receded. The production turned out much larger than was expected, though the quality was inferior, much of it being discolored by copious rains during harvest time. The receipts of timothy seed during the year aggregated 51,608,549 pounds, as against 34,487,440 pounds in 1894; the shipments aggregated 50,853,572 pounds, as against 43,243,193 pounds in 1894. The receipts of clover seed during the year aggregated 5,688,860 pounds, as against 8,945,217 pounds in 1894; the shipments aggregated 7,460,214 pounds, as against 13,922,328 pounds in 1894. The total receipts of grass seeds aggregated 63,868,526 pounds, as against 47,524,961 pounds during 1894; the shipments aggregated 65,567,528 pounds, as against 66,207,092 pounds during 1894, 72,139,009 pounds during 1893, and 60,670,735 pounds during 1892. At the close of the year prices ranged from \$3.15 to \$3.60 per bushel, covering common to prime. Some poor samples sold at

\$1.50 per cental. From the fact that there is but a comparatively small supply in the hands of dealers, a good spring trade is expected. There was but a limited business transacted in hungarian and millet seed. There was an increased acreage devoted to the growth of these varieties in view of the anticipated short crop of timothy seed. At the time when the market was unusually high for timothy seed, old hungarian sold at \$2.75 per bushel; the new seed, however, commanded only from 70 to 85 cents, and millet broke from a range of \$1.00 to \$3.50 to one from 60 to 70 cents per bushel.

The exports of timothy seed for the fiscal year ended June 30th, 1895, aggregated 4,939,237 pounds, valued at \$277,160; of this quantity 2,011,953 pounds were shipped to the United Kingdom, 1,101,820 pounds to Germany, and 1,549,428 pounds to the Dominion of Canada.

FLAXSEED.

The receipts of flaxseed during the year aggregated 8,525,237 bushels, and shipments 4,726,818 bushels, as against 5,102,668 bushels and 2,353,757 bushels, respectively, during 1894. The principal features of this trade during the year were a largely increased acreage, an increased supply in central markets and importations from Russia, India and Argentine. Fears of a diminished yield, created by a severe drought, account for prices during the months of May and June, ranging from \$1.44 to \$1.52½ per bushel. The northwestern crop was a very liberal one. Daily prices for cash and for future delivery may be seen on pages 84, 85 and 86 of this volume. During the fiscal year we imported 4,166,122 bushels, valued at \$4,554,484.

The market for clover seed was without special animation and prices averaged lower than in 1894. The quality of our crop was inferior to that of the foreign crop and the quantity exported was very small. But a small proportion of our crop was good enough to inspect "prime," and the trade throughout the year was dull.

HAY.

The business in hay was satisfactory in all respects. The quality of the hay was unusually good and the demand was uniform throughout the year. Through the intelligent and concerted efforts of our merchants and of the National Hay Association, shippers and farmers have realized the great importance and

value to them of observing uniformity in quality in preparing this commodity for market, and also of packing and baling it in the most approved form and style. This market is the most extensive hay market in the United States and presents greater and better facilities for selling hay than can be found elsewhere; it is growing larger every year, and our merchants who carry on this business are among our most honorable and experienced members. Our receipts of hay bore such relation to the demand, that prices were not subject to such violence and reaction as attend a market where receipts and demand are not in proper proportion.* Illinois and the country lying between the Mississippi River and the Alleghany Mountains, also the northern portion of the state of New York had a light crop, caused by a severe drought. On the other hand, the trans-Mississippi region produced a splendid crop. Northern Wisconsin also turned out a fine crop. These conditions made Chicago a great hay distributing center, and the trade was active and healthy throughout the year. Receipts from the favored west were quickly and favorably sold for shipment to Illinois, Indiana, Michigan, Ohio, southern Pennsylvania and northwestern New York.

The business, particularly from July to December, was exceedingly active and satisfactory. Receipts came from all parts of the west, and Chicago easily took care of them without any congestion in the market. In addition to its ordinary sources of supply, Chicago received heavy shipments from western Nebraska and the Indian Territory, also from Oklahoma. Nebraska and Oklahoma prairie hay bears a most favorable reputation among our hay dealers. In view of the low prices obtained for grain, the prices for hay were very satisfactory. At one time during the year a ton of oats sold for no more than a ton of timothy hay.

The adoption of the same rules for grading hay by the markets of the country has been of manifest benefit to the trade as a whole—both shippers and buyers. Prices of the various grades of hay may be seen on page 95. The crop of hay for the year aggregated 47,078,541 tons, produced on 44,206,453 acres, valued at \$393,185,615. Our exports for the fiscal year aggregated 47,117 tons, valued at \$699,029.

FLOUR.

The chief characteristic of this trade continues the same as in previous years, viz.: a large volume of trade is transacted by our merchants which never appears on any of the commercial records of this city. Sales are very frequent and extensive of flour which can not be reported as a part of our receipts and shipments, yet which, nevertheless, are made by our commission merchants. These sales are made by sample and the flour is shipped direct from the mill to points of destination, the commission merchant merely making the transaction in the capacity of a broker. The receipts for the year aggregated 3,005,400 barrels, and shipments 2,532,000 barrels, as against 4,223,182 barrels and 3,714,007 barrels, respectively, in 1894. The number of barrels of flour exported during the fiscal year ended June 30th, 1895, was 15,268,892, valued at \$51,651,928, as against 16,859,533 barrels exported during 1894, 16,620,339 barrels exported during 1893 and 15,196,769 barrels exported during 1892. Of the quantity exported during the year 1895, 8,825,277 barrels were shipped to the United Kingdom, 792,134 to the Netherlands, 801,063 to the Dominion of Canada, 1,474,333 barrels to the West Indies, 775,425 barrels to Brazil, 787,318 barrels to Hongkong, 256,650 barrels to Germany and 20,4178 barrels to Venezuela. The quantity exported during the calendar year aggregated 14,528,761 barrels, valued at \$50,292,886, as against 15,740,246 barrels, valued at \$57,892,044, during 1894.

The closing prices for the years 1893 to 1895, inclusive, are given in the following statement :

	1895.	1894.	1893.
Winter patents.....	\$3 30@3 50	\$2 50@2 80	\$3 25@3 35
Winter straights.....	2 90@3 25	2 25@2 60	2 80@3 00
Minnesota straights.....	2 40@2 75	2 40@2 80	2 65@2 80
Minnesota patents.....	3 10@3 15	3 20@3 60	3 50@3 75
Low grades.....	1 20@1 80	1 65@1 80	1 40@1 75

Our export trade was less than that of 1894, owing to the fact that Russian and Indian wheat was sold to English millers, a part of the year, at prices which enabled them to compete successfully with American millers in the sales of their flour.

The growth of the flour trade of the United States with foreign countries may be understood from the following table, showing exports each year from 1870 to 1895:

	BARRELS.		BARRELS.
1870.....	3,463,333	1883.....	9,205,664
1871.....	3,653,841	1884.....	9,152,260
1872.....	2,514,535	1885.....	10,648,145
1873.....	2,562,086	1886.....	8,179,241
1874.....	4,094,094	1887.....	11,518,449
1875.....	3,973,128	1888.....	11,963,574
1876.....	3,935,512	1889.....	9,374,803
1877.....	3,343,665	1890.....	12,231,711
1878.....	3,947,333	1891.....	11,344,304
1879.....	5,629,714	1892.....	15,196,769
1880.....	6,011,419	1893.....	16,620,339
1881.....	7,945,786	1894.....	16,859,533
1882.....	5,915,686	1895.....	15,268,892

LIVE STOCK AND PROVISION TRADE.

The number of cattle received in this city during the year was 2,588,558, as against 2,974,363 in 1894 and 3,133,406 in 1893. The number of cattle used for packing and city consumption was 1,803,466. The trade throughout the year was fairly active. Receipts were less than those of the year preceding, but prices were well sustained and the market maintained a healthy condition. The varied forms of dressed beef adapted to different sections of the country and different parts of the world were in steady demand, and the reputation of Chicago as the great provider of meat food of the best quality never stood so high as now. During the earlier part of the year the prices for cattle, in common with those for grain, were not encouraging. Prices in January ranged from \$2.00 to \$5.90 per 100 pounds, covering inferior to prime beeves, and for stock and feeding cattle, from \$2.10 to \$3.60. A sharp demand in the early spring caused an advance in prices, and sales were made at \$6.45 per 100 pounds for the best beeves. This rapid improvement was not altogether advantageous to stock raisers, as it caused many to feed their cattle freely with 40 to 50 cent corn, which was not justified by subsequent prices. The grades of cattle which in March brought \$6.45 to \$6.50, only commanded during the latter portion of the year from \$4.00 to \$4.75. Some exceptionally choice lots, brought in December from \$5.00 to \$5.30. A reduction in demand immediately following the sharp advance in March, more than offset the diminution in receipts caused by a general confidence among farmers and shippers in higher prices. As a consequence, prices declined

instead of advancing, the factor of hard times in the large towns and cities, being left out of the problem by stock dealers and farmers. Prime, medium sized yearlings and "2-year-olds" sold at from \$4.25 to \$5.50, in the month of December; Texas steers ranged from \$1.90 to \$5.75. During the year we received only 360,000 Texas cattle, the smallest number received during any year since 1886.

The number of cattle exported during the fiscal year ended June 30th, 1895, was 331,722, valued at \$30,603,769; of this number, 305,068 were exported to the United Kingdom. The number of cattle exported from Chicago was 158,364, as against 250,906 in 1894. The total exportation of cattle during the year 1894 numbered 359,278, of which 345,734 were shipped to the United Kingdom.

The receipts of sheep during the year were 3,406,739 and shipments 474,646 head, as against 3,099,725 and 333,398 head, respectively, in 1894. The receipts of sheep this year were the largest ever received in one year. Receipts in October numbered 393,820 head, which was the largest number ever received in one month. For the week ended October 12th, 1895, we received 98,163 sheep and on October 1st last, 31,334. Prices were higher in 1895 than those which prevailed in 1894, yet were unsatisfactory to shippers and feeders. A larger export trade than in 1894 and higher prices for wool, rescued the market at times from an absolutely discouraging condition. The range of prices for the year may be seen on page 46. The highest prices prevailed in May and the lowest in November. The number of sheep exported from the United States during the fiscal year ended June 30th, 1895, was 405,748, valued at \$2,630,686, as against 132,370 exported in 1894, valued at \$832,763. Of the number exported in 1895, 335,882 were shipped to the United Kingdom.

Our receipts of hogs during the year numbered 7,885,283 and shipments 2,100,613, as against 7,483,228 and 2,465,058, respectively, in 1894. The month of largest receipts was that of November, when 937,497 were received. On the 11th of February we received 764,551, which is the largest quantity ever received in one day. The estimated valuation of our receipts of hogs during 1895 was \$76,848,460; and the average weight 230 pounds, as against 233 pounds in 1894 and 240 pounds in 1893.

During the first part of the year our receipts included a large proportion of light-weight hogs, which was the result of high prices for corn and low prices for hogs. During the months of February and March, the prices of corn, in view of flattering crop prospects, became cheaper, while the prices of hogs improved. These conditions induced many feeders to withhold their shipments from the market. Many of them, however, pursued this policy for too long a time, and were obliged to accept lower prices. The receipts of hogs in this market for the year show a gratifying increase over such receipts during the year 1894. While Chicago's receipts of hogs materially increased, those of Kansas City, St. Louis and Omaha decreased. The prevalence of hog cholera carried away a multitude of pigs and caused the marketing of a large number of young hogs. High prices of corn at the beginning of the year, followed by low prices of hogs and an excessive corn crop, contributed to render the market a generally unprofitable one to country dealers and shippers.

Through the kindness of Mr. J. C. Denison, the Secretary of the Stock Yards, the following table, showing receipts of live stock for each year from 1880 to 1895, inclusive, is submitted:

Year.	Cattle and Calves. Number.	Hogs. Number.	Sheep. Number.	Horses. Number.	Aggregate value.
1880.....	1,382,477	7,059,355	335,810	10,398	\$148,057,626
1881.....	1,547,498	6,474,844	493,624	12,909	183,003,710
1882.....	1,607,495	5,817,504	620,887	13,856	196,670,221
1883.....	1,909,167	5,640,625	749,917	15,255	201,252,772
1884.....	1,870,050	5,351,967	801,630	18,602	187,387,680
1885.....	1,964,018	6,937,535	1,003,598	19,356	173,598,002
1886.....	2,015,100	6,718,761	1,068,790	27,599	166,741,754
1887.....	2,447,867	5,470,852	1,360,862	46,404	176,644,597
1888.....	2,707,629	4,921,712	1,515,014	55,333	182,202,789
1889.....	3,146,249	5,998,526	1,832,469	79,928	203,321,924
1890.....	3,659,305	7,663,823	2,182,667	101,566	231,344,879
1891.....	3,455,742	8,600,805	2,153,537	94,396	239,484,777
1892.....	3,769,372	7,714,435	2,145,079	86,998	253,836,502
1893.....	3,343,963	6,057,278	3,031,174	82,492	249,542,375
1894.....	3,135,312	7,483,228	3,099,725	97,415	228,153,029
1895.....	2,757,298	7,885,283	3,406,739	113,193	200,584,380

The estimated number of hogs on farms and ranches in the United States on January 1st, 1896, was 42,842,759, valued at \$186,529,745, and the average price \$4.35. In the state of Iowa, there were 4,854,507; in Missouri, 3,169,411; in Texas, 3,035,119; in Ohio, 2,456,626, and in Illinois, 2,392,980. Upon page 203 may be seen a statement of the number of hogs in the country, by states and territories; also the number of sheep, milch cows, and oxen and other cattle. The number of hogs exported during the year ended December 31st, 1895, was 11,352, of which 8,105 were exported to Mexico. The number exported during the fiscal year ended June 30th, 1895, was 7,130, valued at \$72,424. Of this number exported, 4,388 were shipped to Mexico and 1,736 to the Hawaiian Islands.

The United States annually consumes 4,800,000 tons of meat, Great Britain 1,800,000 tons, Germany 1,500,000 tons, and France 1,300,000 tons. The consumption of meat in the United States is estimated at 150 pounds per capita, Great Britain 118, France 71, Germany 64, Russia, 51, and Italy 26. The annual consumption of meat in all European countries averages 61 pounds per capita.

The trade in mess pork was not altogether favorable to packers, especially as compared with trade in this commodity during previous years. The increase in the number of hogs raised in the southern states, also the increase in the number of packing houses in those states, account in a large measure for the unfavorable character of the provision trade in Chicago and the west. Receipts of hogs were much larger than anticipated. Under these circumstances there was little or no inducement for speculation and the market was under the exclusive control of the packing interests, and was devoid of that animation which speculation imparts. It may be remarked, however, in this connection, that animation in a market is primarily caused by conditions, and that speculation is the active commercial expression, in the form of buying and selling, of the effect of such conditions upon prospective values, according to the views of operators.

Probably there was less speculation in this market during the past year than ever before in the history of the trade. It was difficult for our packers to so manage their business as to obtain a fair return for their investments in their extensive packing establish-

ments. In the early part of the year a fair profit was realized, but during its closing months the business was in some instances prosecuted at a loss.

The aggregate number of hogs slaughtered during the year was about 5,730,000. A fair amount of prime mess pork was made to meet an export demand, but a comparatively small amount was kept in stock. Other cuts of pork were made quite freely, such as "Clear," "Back and Short Cut," to supply domestic markets. The price of mess pork opened at from \$11.30 to \$11.40 per barrel. From this time, with slight variations, prices declined to \$9.65 on the last day of January; the highest price obtained in February was \$10.50 per barrel and the lowest \$9.42½. March brought an improvement, the market responding in a general way to an advance in other articles of food; this improvement continued until \$12.87½ per barrel was reached in the month of May. No very marked change in prices occurred until July, when sales were made at \$12.00 per barrel on the 6th of that month. From that date the market ruled decidedly weak and was dull at \$11.00 on the 13th. After vacillating around that price during the remainder of the month, prices struck \$9.90 on the 1st of August. Even then the decline was not arrested and on the 7th sales were made at \$9.30 per barrel. At this decline there was no revival of a demand, and prices again settled. Sales were made during the last days of August at \$9.00 per barrel. The trade in September was most indifferent, and to a large extent quotations were nominal, ranging at from \$8.00 to \$9.00 per barrel. During October prices ranged from \$8.00 to \$8.50 per barrel. The November market held about the same until the last of the month, when \$7.75 per barrel was all that could be obtained.

The December market was a dull one, though on the 28th sales were made at \$8.75 per barrel. On the last day of the year sales were made at \$7.87½, as against \$11.45 on the corresponding day of 1894. The average price of mess pork for the year was \$10.23½ per barrel, as against \$12.58½ in 1894 and \$17.18 in 1893.

Lard was in good demand throughout the year at from \$5.15 to \$7.17½ per 100 pounds, as against \$6.62½ to \$8.52½ in 1894. The highest price obtained in March and the lowest in December. Leaf lard was in fair request by oleo-margarine manufacturers. Detailed statements of prices for the year 1895 and for previous years may

be found on pages 45 and 48 of this volume, and daily prices for cash and for future delivery on pages from 60 to 83, inclusive. The United States exports of lard for the fiscal year, aggregated 474,895,274 pounds, valued at \$36,821,508; and of pork, including fresh and pickled, 59,085,474 pounds, valued at \$4,199,060.

TRANSPORTATION.

From the advance report of the Interstate Commerce Commission and from other sources it is ascertained that the average charge for sending a ton of freight one mile on thirteen of the most prominent railroads in the United States during 1865, was 3.08 cents; in 1870, 1.80 cents; 1875, 1.36 cents; in 1880, 1.01 cents; in 1885, 0.83 cents; in 1890, 0.77 cents; in 1893, 0.76 cents. Thus it appears that 0.76 cents bought as much transportation in 1893 as 3.08 cents bought in 1865. In the year 1895, these railroads carried one-third of the traffic of the country.

The total amount of railroad capital in this country on June 30th, 1894, was \$11,124,930,551, or \$62,458 per mile of line. The net earnings for the last fiscal year amounted to \$322,539,276; the amount received from freight was \$709,477,409, and from passengers \$276,031,571; dividends paid amounted to \$85,278,669. The number of passengers carried was 583,248,007, equivalent to carrying 13,600,531,635 passengers one mile. The average receipts per passenger per mile was 2.03 cents. Of the 1,400,000,000 tons carried 100 miles in 1894 on the railways of the world, 800,000,000 tons were carried on the railways of the United States. Add to the 600,000,000 tons carried 100 miles on the railways of the world outside of the United States, 140,000,000 tons carried on the ocean in the commerce of the world, we have in the 800,000,000 tons carried on the railways of the United States, 60,000,000 tons more than on all the railways of the world outside of the United States and in all the ocean commerce of the world put together. This traffic is carried by the American railways at an average of eight mills per ton per mile, while the railways of Great Britain charge two cents and eight mills, France, two cents and two mills, Germany, two cents and six mills, Italy, two cents and five mills and Russia, two cents and four mills.

The Supreme Court of the United States has rendered an important decision relating to the Interstate Commerce Law, viz: the decision in the case of Theodore F. Brown. Brown was

auditor of the Allegheny Valley Railroad, which was charged with discrimination in favor of a coal company. He was summoned as a witness but declined to testify as to his knowledge of such discrimination on the ground that his testimony might criminate himself, endeavoring to shield himself under the prerogative supposed to be accorded to the citizen in Section 860 of the United States Revised Statutes, and in the Federal constitution itself. The court held that the act of Congress of February 11, 1893, which enacts that no person shall be prosecuted or subjected to penalty on account of any testimony which he may give when compelled to do so by the Interstate Commerce Commission, keeps within the constitution, since it expressly provides immunity for the witness compelled to testify under such circumstances.

Another important decision was that known as the "Social Circle case", involving the long and short haul clause. The case was one in which a Cincinnati manufacturer complained that the Cincinnati Southern, Western & Atlantic and Georgia Railroad Companies charged the same rate for transporting buggies from Cincinnati to Augusta, Ga., a distance of 645 miles, as from Cincinnati to Atlanta, a distance of 747 miles, and 30c. more per hundred to Social Circle, Georgia, situated between Atlanta and Augusta, than to either of these two points.

This was a clear violation of the "long and short haul" clause. The position of the defense was that the additional charge of 30c. per hundred was the local charge of the Georgia Company, and consequently the case was not within the jurisdiction of the Interstate Commerce Act. The Supreme Court sustained the Commission and held that the Georgia Railroad in this case became part of a continuous line for the continuous carriage of freight.

The great subject of inland and interstate commerce has always been considered by the people as closely allied to our national development and hence has received the fostering care of the general government from its foundation. Transportation facilities more than anything else promote that commerce and contribute to such an active interchange of commodities as stimulates production, inspires emulation, quickens enterprise and brings our varied and wonderful natural resources within the reach of all sections of the country. Unless, however, such transportation facilities are equitably distributed in all respects; and unless there is

absolutely no discrimination, either in rates of freight, classification of commodities, or otherwise, against any section, any interest, or any person, these facilities will fail of their highest and designed purpose.

Very respectfully,

GEORGE F. STONE,

Secretary.

NOTE.—I am indebted to Messrs. Howard, Bartels & Co.; United States and State Statistical Department; United States Weather Bureau; Comptroller of the City of Chicago; Secretary of the Lumberman's Exchange; J. C. Brown, Statistician of the New York Produce Exchange; Central Traffic Association; Hon. Washington Hesing, Postmaster, Chicago; Department of Public Works, Chicago; "Cincinnati Price Current;" J. B. Cavanaugh, Second Lieut., Corps of Engineers; John Jones, London; Hon. Martin J. Russell, Collector of Customs, Chicago; William B. Thornton, Chicago; J. L. Kellogg; and to statistical literature generally, both foreign and domestic.

REPORT OF THE BOARD OF DIRECTORS.

To the Members of the Board of Trade of the City of Chicago:

GENTLEMEN—In compliance with the rules of this association, the Directory herewith submits its report of receipts and expenditures for the fiscal year ending January 6, 1896:

RECEIPTS.

From annual assessments.....	\$184,945 00
From 133 transfers of memberships.....	3,325 00
From Visitors' tickets.....	4,070 00
From Special tickets.....	750 00
From Messengers' tickets.....	1,062 00
From Clerks' tickets.....	} \$1,645 50
Less salary Manager of Settling Room.....	
From table and drawer rentals.....	840 00
From Board of Trade Clearing House.....	3,844 95
From sales Messenger badges.....	3,718 27
From rentals of Telephone Room.....	44 50
From Corn Exchange Bank, loan January 16, 1895.....	234 74
From Appeal, fees held in trust on case not tried.....	5,000 00
From collections for Kansas and Nebraska sufferers.....	10 00
From collections for Oklahoma sufferers.....	15,305 00
From Real Estate Department.....	295 50
	106,648 60
	\$330,059 06
Cash on hand January 8, 1895.....	4,659 56
	\$334,718 62

EXPENDITURES.

Interest on \$1,250,000 bonded indebtedness.....	\$ 80,666 25
Taxes on Real Estate for 1894.....	27,004 91
Insurance on building, rentals, boilers, etc.....	4,775 00
Construction account, new contracts, Real Estate Department.....	38,677 83
Expenses of Real Estate Department.....	51,305 88

CHICAGO, January 7, 1896.

This is to certify that the foregoing report of the receipts and expenditures of the Board of Trade of the City of Chicago for the fiscal year ending January 7, 1896, is true and correct. I audited all the books of accounts, proved the record of receipts and examined vouchers for all disbursements.

WM. FRIES,

Auditor.

JANUARY 13, 1896.

The total bonded indebtedness of the Board is the same as at the close of the last fiscal year, viz : \$1,250,000.

The taxes paid on the real estate of this Board for the year 1894 amounted to \$27,004.91.

The receipts derived from rent of offices in the Board of Trade building aggregate \$106,648.60, as compared with \$109,841.77 during the year 1894.

Your Directory feels justified in fixing the assessment for the year 1896 at \$65.00 per capita, or \$35.00 per capita less than was the assessment for 1895.

Expenditures in the real estate department throughout the year have been as follows :

Interest on bonds.....	\$60,666 25
Taxes	27,004 91
Insurance.....	4,775 00
Expense of the real estate department, including salaries of engineers, janitors, firemen, elevator men, etc.	51,305 88
	\$143,752 04

The present membership of the association is 1,848, the number of transfers made during the year was 133, yielding a revenue of \$3,325.

Your Board of Directors, acting under the provisions of Section 27 of Rule IV of the Rules of the Board of Trade, has allowed fourteen members to withdraw from the association and surrender their privileges of membership, and has paid thirteen of such retiring members \$525 each, and one member \$550, aggregating \$7,375.

The receipts of grain and of flour and its grain equivalent aggregated in 1895 189,432,819 bushels, as compared with 187,553,469 bushels in 1894, and the shipments aggregated in 1895 171,464,137 bushels, as against 148,638,822 bushels in 1894.

The number of cattle, hogs and sheep received in this market was 14,162,513, valued at \$200,584,380.

The shipments of meat in various forms during the year 1895 aggregated 1,697,953,766 lbs., as against 1,750,376,155 lbs. in 1894 ; of pork, during the year 1895, aggregated 300,029 barrels, as against 222,676 barrels in 1894 ; and of lard, the shipments in 1895 aggregated 387,437,699 lbs., as against 409,211,462 lbs. in 1894.

This and similar information may be found properly and conveniently classified, also such other statistical information of a

general character, both domestic and foreign, as sustains an important relation to the business of the members of this Board, in the Secretary's annual review.

The amount of clearances as reported by the Board of Trade Clearing House for the year 1895 was \$78,133, 437.50, and the aggregated balances for the year amounted to \$28,726,490.75, as against \$56,060,294.88 and \$20,519,901.58, respectively, for the year 1894. After the payment of all bills, the Clearing House paid to the Board \$3,718.27, which is \$2,978.91 more than the revenue derived from its business of 1894.

Your Committee on Transportation has had frequent sessions, and has carefully guarded the trade against unjust discrimination in rates of freight and in facilities afforded by transportation lines.

Your committee insists upon the observance on the part of common carriers of their proper attitude to the public, viz : that these lines derive their franchise from the people, and to the people without discrimination they owe an equitable distribution and allotment of transportation privileges, including rates, conveniences and facilities for business at terminal points. While your committee concedes that transportation lines are entitled to reasonable compensation for services rendered, they are not entitled, either directly or indirectly, by any ingenious system of accounts, to excessive rates.

Your committee has been aided in the prosecution of its labors by the Chicago Freight Bureau, conducted under the able management of Commissioner Iglehart, who in due time will submit a comprehensive and detailed report of the results of the efforts of the Freight Bureau for the year.

Upon the recommendation of your Committee on Transportation your Board of Directors has acquiesced in the position sustaining the Inter-State Commerce Law and opposing any change in Section 5 of that measure, which prohibits pooling. In accordance with this action your delegates to the National Board of Trade will present to that body, at its next annual meeting, a resolution that the National Board of Trade is opposed to any change in Section 5 of the Inter-State Law relating to pooling until such times as the carriers can show that they have been injured by an honest observance of the law and a faithful maintenance of their legal published rates.

Not yet have the transportation lines of this country observed

honestly and faithfully the provisions of the Inter-State Commerce Law, enacted for the benefit of the people and directly aimed at encroachments by common carriers upon the rights of the people.

The condition of rates for the transportation of grain with reference to the Chicago market has been far from satisfactory, and much thought and labor have been bestowed during the year upon this important phase of commercial life seriously affecting one of Chicago's largest interests. In many instances when rates upon grain via Chicago have been put into effect by railroad companies which seemed detrimental to Chicago dealers the matters have been promptly taken up by the Bureau co-operating with receivers and shippers and the conditions complained of have been quickly remedied.

The labors and thought of your committee lead it to the conclusion that the only radical solution of this question is the plan strongly desired by the business interests of this city—viz.: the establishment of a basing line from Lake Superior south through Chicago along the east line of the State of Illinois to the Ohio River, or beyond, and that all rates, both East and West, should be made from and to said basing line, with the sum of rates via Chicago as low as via any other gateway, thus placing all routes upon an equal basis and allowing the grain to reach the Chicago market under the same conditions it now reaches St. Louis and other junction points, untrammelled by any question as to point of origin or time of arrival, free to be sold on the open market whenever the owner wishes, and free to be sent forward by the buyer when and where he pleases. The elaboration of this view will be found in the annual report of Commissioner Iglehart, of the Bureau.

The committee, however, desires to add that efforts are now being made to abolish the arbitraries imposed upon shipments of grain via Chicago above the rates via other junction points from points on the A. T. & S. Fe and the C. & E. I. Railroad companies.

Your committee, in conjunction with the Freight Bureau, addressed itself energetically to the subject of an entirely new classification within the State of Illinois. The Railroad and Warehouse Commission, after a protracted hearing, decided on July 1st, 1895, to put into effect an entirely new classification governing shipment of freight within the State of Illinois, thus doing away with the gross discrimination in classification which for a long time had opposed the merchants and shippers of this State who for years

had been striving to compete upon their shipments to Illinois points with the merchants of competing cities outside of the State whose shipments were carried by the railroad companies under a classification greatly lower than the classification in effect locally within the State.

The Illinois Railroad and Warehouse Commission, alive to the vast commercial interests involved, determined that the State of Illinois, containing the largest railroad mileage of any State in the Union, should enjoy the diversified benefits of a classification of freight as low as any in existence, and they accordingly put such a classification in effect.

The estimates of the railroad officials place these reductions in this new classification at 25 per cent. below the classification in effect prior to July 1st, 1895.

All business interests agree that business for the last six months has shown a material improvement over that of the corresponding period of last year and unite in the opinion that the volume of business for six months ending July 1st, 1896, will greatly exceed that of the corresponding period in the year 1895.

It must not be supposed, however, that the immense saving thus made to the mercantile interest of the State will be a total loss to the railroads, for it is confidently expected that the reduction will be more than made up to the transportation companies through largely increased volume of business in lines of merchandise shipped from Chicago and other distributing centers in the State of Illinois, which under the previous unjust conditions could not be so shipped owing to the discrimination existing in the classification of commodities. It is no small cause for congratulation, therefore, that for the first time in the history of the State of Illinois it has a classification which is as low as that prevailing in any other State in the Union.

Your committee, availing itself of the efficient services, experience and facilities of the Freight Bureau, has directed its attention to the importance of overcoming the barrier in the form of excessive charges set up and insisted upon by thirty-five railroad and steamship companies embraced in the Southern Railway & Steamship Association and is endeavoring to secure for Chicago and the Northwest an entitled proportion of the growing trade of nine great States, containing a population of twelve and a half

millions of people and embracing a territory of 421,000 square miles.

This action and subject have acquired an additional importance from the efforts which have been made by the merchants of Chicago to cultivate closer commercial relations between the Northwest and the Southeast.

In 1891 bills of complaint were filed by the Freight Bureaus of Chicago and Cincinnati against this inequitable adjustment of rates to and from this great territory.

In May, 1894, the Inter-State Commerce Commission rendered its decision favorable upon every point advocated by the Freight Bureau, and the different railways were ordered to put into effect a much lower schedule of rates than they had been charging. The associated railroad and steamship companies defiantly refused to obey the mandate of the Commission, whereupon the Commission filed a bill in equity in the United States Court of the Southern District of Ohio, at Cincinnati, asking that the railroads be enjoined from further insisting upon the unjust and discriminatory rates complained of, and to compel obedience by the railroads to the order and finding of the Commission.

Subsequently three cases, involving many of the same legal questions, reached the Supreme Court of the United States from different parts of the country, the decision of which cases will virtually settle the law in our case, and the Commission has recently been notified that the Supreme Court desires an argument of the case before a full bench. It is expected that ere long these cases will be exhaustively argued by eminent counsel and we may expect an early decision upon the same.

Your Committee on Membership properly conceived that the duties of none of the standing committees of the Board are paramount in importance to those which devolve upon this committee. The committee, acting in accordance with the views of the directory, has subjected every applicant for membership to a thorough examination, not only regarding his present standing, but his previous record, and has required from every applicant an agreement under oath that he will not under any circumstances, either directly or indirectly, engage in, or be in any way associated with bucket-shop business, nor aid or abet in any way any violation of the bucket shop law of the State of Illinois. Your committee has held regular weekly sessions and has placed on

record, for future reference, the answers and representations made by applicants for membership in this Board during the past year. It is a wise provision of your rules that no person can become a member of this Board unless he has been recommended by the Committee on Membership and has received at least ten affirmative ballot votes of your Board of Directors. We cannot too zealously guard this part of the work of the Board, and experience teaches your Board of Directors that it is quite impossible to exaggerate its importance and the vital relation which it sustains to the welfare of this commercial organization—organized by the law of the State of Illinois for commercial purposes, and to maintain and promote the highest mercantile integrity.

Your Committee on Meteorological Observations, in the discharge of its duties, has received the co-operation of Prof. Garriott, the Chicago Forecast Officer, who has been most courteous in promptly affording to the members of this Board and to the country the invaluable information provided by his office.

Upon your Warehouse Committee has devolved special and exceptional duties, demanding much of its time during the past year. It was not deemed for the best interest of the trade to declare all the warehouses regular for the storage of grain and flaxseed that applied to be regular warehouses under the rules of the Board.

Your committee contends that it is against sound public policy that a public custodian of grain, upon whom is conferred special privileges by the State for the single purpose of serving the people upon equal terms, should be a dealer in grain; that the impartial discharge of duties appertaining to a public custodian of property is impossible when private and personal interests of such custodian are involved therein; that it was never the intention of the people, or of the Legislature of the State of Illinois, that any person, upon whom is conferred public and special privileges, should be allowed to use such privileges for his private gain or advantage.

On March 8, 1895, written complaints were presented by the Warehouse Committee to the Railroad and Warehouse Commission of the State of Illinois, asking the revocation of the licenses of thirteen systems of public elevators of class "A," upon the ground that such elevators were violating the law in buying

and selling grain and mixing their grain with that of other depositors in their warehouses.

A somewhat protracted hearing followed before the Commission, in which the Warehouse Committee was represented by counsel, and a large amount of evidence taken.

On April 11, 1895, the Commission took the case under advisement until the 27th of September, 1895, when they decided it to be illegal for warehousemen to deal in grain in their own warehouses and mix it with that of other depositors, and accordingly the Commission entered an order revoking the licenses of nine of these elevator systems.

The case against the Illinois Trust & Savings Bank was dismissed because it appeared that such company was no longer engaged in business.

The cases of three other elevator systems were continued at the request of your committee for further evidence, it being disclosed upon the hearing that the dealing in grain in these cases was not done in the name of these concerns, but by firms or corporations closely connected with and supposed to be identical in interest with the elevator companies, and it being deemed prudent by your committee before closing these cases, to secure additional evidence, in order to show the identity of the concern dealing in grain with the elevator company itself.

The difficulty in showing this resulted from the refusal of the elevator proprietors to testify or to permit their employes to testify before the Railroad and Warehouse Commission.

These witnesses can be forced to testify by recourse to the courts, but it was thought advisable not to proceed along this line until the other cases were decided by the courts.

Your Committee on Flaxseed inspection has kept in touch with the requirements of the trade. The publication by the chief inspector and registrar of Flaxseed, of receipts, shipments and stocks in store, from time to time, has enabled the trade to act understandingly and has placed it in possession of all necessary information in this department.

The decisions and inspection of our Chief Inspector of Flaxseed have been amply sustained and properly enjoy the confidence of consignors, receivers and buyers alike.

The receipts of Flaxseed during the year aggregate 8,525,237 bushels.

The shipments of Flaxseed for the year aggregate 4,726,818 bushels.

The stock on hand December 28th, 1895, was 895,177 bushels.

Your Committee on Weighing has carefully supervised the important interests committed to its care.

On the 7th of October last the Association adopted a rule whereby it was made incumbent upon the members of the Board, or of firms or corporations represented in its membership, acting as commission merchants in the sale of grain or flaxseed in this market, or acting as purchasers of grain and flaxseed at country points, when Chicago weights are the basis of settlement, to furnish a public or disinterested certificate of weights. The provisions of this rule caused some discussion, and although all did not at first readily co-operate in the enforcement of the rule, it is now believed that its provisions meet with general approval and that the trade has amicably adjusted itself to its requirements.

Your Committee on Market Reports has made ample provision for prompt and accurate quotations of grain and provisions, etc., in both domestic and foreign markets, and has given to the Board such statistical information concerning the movement of crops at home and abroad, and the exports from this and other surplus wheat producing countries as have enabled the members to execute orders for the purchase or sale of grain and provisions under the most favorable circumstances.

It is confidently believed that in no other Exchange is posted so reliable and important statistical commercial knowledge as is made known to the members of this Board by cable and telegraph.

Your Clearing House Committee has great satisfaction in presenting to the Board the results of clearances for the year, especially as they show that the business of the members of the Board has been larger and more profitable than during the year preceding. The amount of clearances exceeds that of 1894 by over \$22,000,000.00; the balances exceed those of 1894 by \$8,200,000.00; and, as hereinbefore shown, the total profits derived from the Clearing House, for the year, amount to \$3,716.27, which is nearly \$3,000.00 in excess of the corresponding amount for 1894.

Your committee has changed the location of the Clearing House rooms so that they are much more easily accessible than were the old rooms; and the appointments of the office have been made in

view of the convenience of the members of the Board and despatch of business.

Your committee has also given special attention to the qualifications of corporations for membership in the Clearing House, in order that the rule of the Board that no corporation shall have at any time the privileges of the Clearing House, unless the President and Secretary of such corporation shall both be members of this Association and in good standing, be strictly observed.

Your Committee on Rooms has been frequently called upon to pass upon applications for admission to the rooms and to preserve order.

It has been careful to observe in the performance of its duties and in granting admission to the Exchange Hall—the rights and privileges of members—the importance of not allowing these privileges to be encroached upon by any mistaken ideas of courtesy. It has taken pleasure in extending the hospitalities of the room to visitors, and especially to those representing other cities, kindred organizations and to members of the press.

The committee is pleased to report that the members generally have co-operated with the committee and that its duties have been made most agreeable by such co-operation.

Your Committee on Legal Advice has had frequent occasion to hold sessions and to consider constantly arising questions that come up before the tribunals of this Association with reference to the rules of the Board and also with reference to the laws of the State. It has been careful that these have not been infringed upon in any case nor the Board exposed to any risk arising from illegal phraseology or action.

In the Murry Nelson litigation, the Superior Court of Cook County sustained the demurrer of the Board of Trade that mandamus would not lie. On appeal to the Appellate Court the order of the lower court was reversed and the case remanded. Answer was filed by the Board of Trade in the lower court and demurrer to answer was sustained and judgment entered granting the right of mandamus against the Board of Trade. From this judgment the Board of Trade has taken an appeal to the Appellate Court. Records and briefs have been filed and the case is now pending.

In December, 1895, a petition was filed in the Superior Court of Cook County by Hugo H. Baumann for writ of certiorari. The

papers are returnable to the January term, 1896. Appearance has been entered and a return is being prepared.

In December, 1895, a bill was filed in the Superior Court of Cook County by Harry M. Greene for an injunction, which was issued by Judge Payne. Steps are now in progress to obtain a dissolution of this injunction.

Unusual and onerous duties have devolved upon your Real Estate Committee during the past year. Contracts have been made for necessary expenditures in the Engineer's Department for general repairs and for the enlargement of the offices on the lower floor of the building, also for re-wiring the entire building, in compliance with the order of the city authorities and upon the recommendation of the Board of Underwriters.

The total amount of contracts made for these improvements was \$53,788.07, of which amount there was paid on January 6th, 1896, \$38,677.83, leaving unpaid and due on contracts \$15,110.24.

The Real Estate Committee has increased the rental on the offices directly benefited by this improvement to such an extent that it is expected that the amount thus expended will in a short time be returned to the Board.

Although the aggregate of rentals shows a little less than the corresponding amount for 1894 all but two of the offices in the Board of Trade Building are occupied.

Your Committee on Provision Inspection has been called upon frequently to investigate applications for warehouses to be declared regular for the storage of provisions under the rules of this Board. It has in the discharge of its duties made careful examination of the adaptation of buildings or warehouses thus proposed to be made regular, and also carefully considered in all respects such applications; and has been of great service to the Finance Committee with reference to bonds required from proprietors of such warehouses. Your committee has in many instances been consulted with regard to transactions in provisions and has given such judicious advice that few cases have been presented to the Arbitration Committee with respect to the sale and delivery of the great variety of forms and cuts in which provisions are sold in this market.

Your Committee on Flour Inspection has on many occasions conferred with your Chief Inspector, and has maintained the integrity of the inspection and adjusted such controversies as have

arisen between the buyer and the seller so that very few differences have found their way to the other tribunals of this Association.

Your directory is more than ever convinced of the insidious, pernicious, undermining and absolutely demoralizing influence of bucket-shops and bucket-shop methods. A special committee was appointed to conduct such investigations as would tend to stamp out this so-called business which is without a single commercial feature and is a standing insult to merchants in all departments of trade. This committee has been unremitting in its labors and has achieved very gratifying results.

Your Board of Directors caused an advertisement to be inserted in various journals to the effect that the Secretary of the Board would be pleased to answer any inquiries as to whether any particular person or firm is a member of this Board.

This advertisement was inserted because your directory has reason to suppose that a large number of persons were deceived into trading with concerns or individuals who had no relation to this Board, and therefore were not governed by its rules and regulations and were not under those obligations which rest upon the members of this commercial body, chartered for commercial purposes, whose chief, if not controlling object, is the maintenance and promotion of the highest mercantile integrity.

In response to this advertisement the Secretary of the Board has received about 1,500 letters of inquiry, each one of which has been fully answered; and the opportunity thus afforded has been improved to make known the fact that members of this Board have exceptional opportunities for executing orders for the purchase or sale of grain and provisions in the most favorable manner, and that non-members of this Board can not possibly enjoy the facilities and the opportunities for the favorable transaction of business which are enjoyed by members of this organization.

Moreover, it has been emphasized in this correspondence, that, in the first place no person can become a member of this commercial body unless his present standing and responsibility, as well as his previous record, are known and approved by the membership committee; and unless such applicant has received at least ten affirmative votes of your Board of Directors.

There have also been distributed about 1,500 lists of the members of this Board among correspondents located in all parts

of the country ; also a large number of copies of the rules and regulations of the organization have been mailed to non-members of this Board.

We believe that the amount thus expended has been wisely appropriated and that the membership of this Board has already received and will continue to receive substantial advantage from this action of your directory.

The number of deaths during the year was twenty-one, including Milton C. Lightner, who served the Board for two years as its Vice-president with a rare felicity and ability and who left behind him, for our inspiration, a career of undeviating mercantile integrity; and also including Carlos H. Blackman who was chosen one of the Directors at the beginning of the year. Mr. Blackman was a gentleman of unfailing courtesy, and who exercised rare judgment in the discharge of the oftentimes delicate and difficult duties which devolved upon him; he was scrupulously faithful to every trust committed to his care and gave to the Board a disinterested service which can never be repaid.

Fitting words of eulogy and sympathy have been placed on the records of the directory.

MEMBERS OF THE BOARD OF TRADE WHO DIED
DURING 1895.

Patrick McLoughlin,
Adrian C. Van Rossem,
Martin S. Robison,
Frank M. McFarlin,
Ira Holmes,
William Young,
Adolph Vieser,
Charles L. Beers,
Nathaniel S. Jones,
James F. Canfield,
Charles P. Libby,

Stephen B. Webber,
Carlos H. Blackman,
Albert T. Spencer,
Patrick Cavanagh,
John B. Drake,
John Cameron,
Joseph M. Watte,
Milton C. Lightner,
John F. Brine,
John Gormly.

Many were prominently identified with the history of the Board and contributed in a great variety of ways to its prosperity, and performed their part with zeal and fidelity.

Respectfully submitted on behalf of the Board of Directors.

WILLIAM T. BAKER,
President.

REPORT OF THE TREASURER.

To the President and Directors of the Board of Trade of the City of Chicago:

GENTLEMEN :—As Treasurer of the Board of Trade of the City of Chicago, from the 8th of January, 1895, I beg to report that—

I had on hand January 8th, 1895.....	\$ 2,854 96
I have received in sundry deposits from the Secretary of the Board, from January 8th, 1895, to the close of the fiscal year, January 6th, 1896, both inclusive.....	298,273 00
	<u>\$301,127 96</u>

I have paid 735 checks drawn by the Secretary, and duly countersigned, amounting to.....	\$265,411 52
--	--------------

Leaving a balance on hand at this date of.....	\$35,716 44
--	-------------

Check 707, dated December 30th, 1895, for \$15.75, is outstanding.

Respectfully submitted,

ERNEST A. HAMILL,

January 7th, 1896.

Treasurer.

INAUGURAL ADDRESS OF WM. T. BAKER, PRESIDENT.

Fellow Members of the Board of Trade:

Once again it is my privilege to thank you for the honor you have conferred upon me. This renewed expression of your confidence and esteem is all the recompense I ask for such service as I shall be able to render your Association for another year.

On the beginning of this new year I think we are justified in anticipating better times and more prosperous business. But there are three obstacles that confront us, two of which are peculiar to ourselves but from which the entire grain trade both East and West is suffering, and the other of which concerns not us alone but every one who lives or expects to live in the United States of America. I refer to the bucket-shop iniquity, the elevator monopoly and the free-silver lunacy. The first two of these evils are local in their origin, though widespread in their effects, and their cure must depend mainly on ourselves. The last can be averted only by the united effort of business men, laboring men and professional men of the entire country, and in this we may take a leading part.

Your Board of Directors during the past year has been united in its purpose to suppress bucket shops and bucket shopping, and distinct progress has been made. All that has been attempted has borne some fruit, and it is likely that future operations may be facilitated by a more general appreciation by the community of what bucket shops really are. It is beginning to dawn upon the comprehension of the public that every one connected with the bucket shops are thieves and swindlers, and the man who is guilty of bucket shop practices can no longer shield himself under the cloak of respectability. It would be obviously improper to indicate in detail what may be proposed, but I can assure you that no effort will be spared to eradicate this evil. Membership in this Board will not shield any one if found guilty, for it must be our highest aim to keep the roster of our members above suspicion, to make it, in fact, a roll of honor.

While something has been accomplished toward improving the status of the elevator question, there is much remaining to be done.

The law's delay has been invoked against you, not with the hope of ultimate success, but to weary you and tire you out. The recent court decision did not touch the merits of our cases, which will be pressed with such vigor as your Directors are capable of, and an early decision is hoped for. There is some misapprehension apparent outside this Board as to the relation of elevator companies to the general business of the city. They claim to be public benefactors, in that they bring grain in large amounts to this city that would otherwise go elsewhere. This is said to furnish employment to more banking capital and keep up the rate of interest and to give business to railroads and insurance companies. But we know that half a dozen firms and corporations have a monopoly of the business. They cannot bring grain here that is not naturally tributary to us, except on cut rates of freight denied the general public and forbidden by law. Nearly every railroad terminating here has some favored elevator system under its protection, the proprietors of which are given such profitable concessions as to enable them to control the business. If the contention of this Board is sustained each railroad will have a host of competing patrons instead of one; bankers will have a thousand active accounts instead of the small group of large borrowers who are now able to combine and dictate rates, while the short-rate card of insurance offices will again come into use. But the real question is not whether it may add to the traffic of railroads or increase the profits of banking or insurance capital, but whether it is right for public custodians of grain to be at the same time dealers in grain and enabled to select and set aside for their own purposes the best of what may come under their charge. No objection is made to all the grain coming to Chicago that can be legitimately brought here, but it is against public policy, and is not the legitimate function of a public warehouseman, operating under a license from the state and the rules of this Board, to be so engaged. It is the dual capacity that we object to and that is prohibited by law. Last spring the quality of millions of bushels of grain stored in public warehouses was aspersed by interested speculators. This Board, through its officers, sought to have such an investigation made as would refute the slander against grain stored in public warehouses and restore the confidence of buyers and holders of property made regular by your rules. But every elevator proprietor in Chicago joined in refusing permission to

your representatives to make that necessary and wholesome examination. They knew the grain was above the average in quality and condition but were willing to have it suspected in order to increase the carrying charges. The present monopoly is against everything and everybody but themselves.

By the rankest and most brazen manipulation they seek to control the price and movement of our commodities and force every buyer and every seller to their terms. A year ago they were selling Spring Wheat at 5 or 6 cents premium. Now they are selling Winter Wheat at a like premium, while they have not been the owners of either. While they are nominally the custodians of your property they are able, in violation of the laws of the state, to set aside and sell at a premium millions of bushels every year, not owned by them but in their custody as warehousemen. Would any court permit a trustee of an estate to thus handle trust funds for his own advantage? This gain is not the legitimate profit of a public warehouseman. It belongs to you or whoever owns the grain. The lawful profit of the business of public warehousing has been attractive enough to create an enormous system of elevators here. If the business has been overdone it is due to the cupidity of those engaged in it. This Board will cheerfully concede a fair return on capital actually employed in lawful operation of elevators, but will forever resist the use of its machinery for unjust or illegal practices. If it is possible to close the courts against us we have remedies within our own Association that neither money nor influence can buy.

The pulse of business is sought in the great exchanges of the country and nowhere is it more sensitive than in this Board of Trade. Whatever affects the weal or woe of the commerce of this country is immediately reflected here, so that no class of business men can have greater interest than we in the impending crisis in national finances.

All our internal differences are of small or passing importance compared with the one great question whether the credit of the nation is to be sacrificed through the ignorance or demagoguery of Congress. Between the rapacity of the mine owners, who among their other assets are able to schedule Senators of the United States, and the zeal of politicians whose patriotism is bounded by their partisanship, we are in constant danger of drifting to a silver basis. The treasury is forced to dubious expedients in order to

postpone this calamity. These expedients are likely to be less effectual and more embarrassing as our stock of gold is drawn upon for export, and no matter what party may control the government, there can be but one final result from present conditions. Our stock of gold is not unlimited, and the drain upon it will never permanently cease until we turn from the blind fatuity of forcing the circulation of a good dollar and a bad dollar side by side on equal terms.

In our transactions on 'Change No. 2 Spring Wheat and No. 2 Red Winter Wheat are each a legal tender on contracts. We have the double standard, and for years past we have seen that it is the kind that has least commercial value that weighs upon the market. The better or more valuable grade disappears—is either hoarded or shipped away, while the cheaper or less desirable kind remains to plague us. This is a forcible though familiar illustration of the operation of the Gresham law, the law that never in the world's history has failed to operate when the money of a country has a varying or unequal standard. We encourage the speedy and ceaseless operation of this law by a system of legislation which, if intended to drive gold from circulation, could not have been more ingeniously devised.

In order to maintain the credit of the government by keeping the parity between gold and silver as required by law, the treasury must redeem greenbacks and Sherman notes in gold, and this redemption is accompanied by the absurd requirement that such notes must be paid out again and kept in circulation, to be again and again redeemed in gold. This imbecile legislative contrivance has placed us at the mercy of foreign enemies or alien speculators in bullion, and recent events have shown us that such enemies and speculators know their advantage and are not slow to profit by our weakness. There is but one remedy for this deplorable condition of affairs. Provision must be made for the permanent retirement of the five hundred millions of greenbacks and Sherman notes. Long time bonds bearing a low rate of interest and payable in gold should be authorized for this purpose, and if such bonds were permitted to be used by national banks as security for circulation redeemable in gold, they would be quickly absorbed, and the transition would be easily and safely made; all the hoarded gold in the country would immediately come back into circulation, and this country would enter upon an era of unexampled prosperity.

There is no politics in this proposition. There is only partisanship, ignorance and greed opposed to it. There should be patriotism enough in Congress to take this, the only wise course to restore American credit and invite the capital of the world to American enterprises. It would restore confidence and start the wheels of every mill and give employment to all the unemployed, and labor would continue to be paid in money worth 100 cents on the dollar.

The prospect of any intelligent legislation is at this time doubtful, but it is nevertheless the duty of every business man who knows the value of credit in business enterprises, and of every citizen who cherishes the honor of his country to cry out in protest against the puerility of Congress. No man who represents an honest and intelligent constituency in either house of Congress who fails in his duty on this supreme question can look for future preferment. But the next election is a long way off. We should not wait to get at them with our votes, for delay may mean ruin to the business of the country. Let every one of us by letter or petition or in any way in which we can make our influence felt, do what we may to secure this currency reform and save the country from humiliation and disgrace. This Board of Trade controlling the commerce of the Northwest can serve no higher purpose than to lead in this crusade in behalf of the national honor as it has always led in patriotic endeavor.

ALL-RAIL THROUGH BUSINESS.

The following statement shows the quantity of flour and grain received at Chicago during 1895, by western railroads, and delivered to connecting lines without passing through a Chicago warehouse, as reported by such roads. These quantities are all included in the general statements of receipts and shipments published herewith, except shipments originating in Milwaukee; these are deducted from the receipts and shipments of Chicago, as shown by the general statements, but are included in this:

Chicago & Alton Railroad.

GRAIN INSPECTION.

Rules governing the Inspection of Grain in the City of Chicago, State of Illinois.

The following are the rules adopted by the Board of Railroad and Warehouse Commissioners establishing a proper number and standard of grades for the inspection of grain, as revised by them; the same to take effect on and after November 14, 1892, in lieu of all rules on the same subject heretofore existing.

RULE I.—WINTER WHEAT.

- White winter.** No. 1 white winter wheat shall be pure white winter wheat, or red and white mixed, sound, plump and well cleaned.
- No. 2 white winter wheat shall be white winter wheat, or red and white mixed, sound and reasonably clean.
- No. 3 white winter wheat shall include white winter wheat, or red and white mixed, not clean and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.
- No. 4 white winter wheat shall include white winter wheat, damp, musty, or from any cause so badly damaged as to render it unfit for No. 3.
- Long red.** No. 1 long red winter wheat shall be pure red winter wheat of the long-berried varieties; sound, plump and well cleaned.
- No. 2 long red winter wheat shall be of the same varieties as No. 1; sound and reasonably clean.
- Hard winter.** Hard winter wheat.—The grades of Nos. 1, 2, and 3 hard winter wheat shall correspond, in all respects, with the grades of Nos. 1, 2, and 3 red winter wheat, except that they shall be of the Turkish variety.
- In case of mixture of Turkish red winter wheat with red winter wheat it shall be graded according to the quality thereof and classed as hard winter wheat.
- Red winter.** No. 1 red winter wheat shall be pure red winter wheat of both light and dark colors of the shorter-berried varieties; sound, plump and well cleaned.

No. 2 red winter wheat shall be red winter wheat of both light and dark colors; sound and reasonably clean.

No. 3 red winter wheat shall include red winter wheat not cleaned and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

No. 4 red winter wheat shall include red winter wheat damp, musty, or from any cause so badly damaged as to render it unfit for No. 3.

In case of the mixture of red and white winter wheat it shall be graded according to the quality thereof and classed as white winter wheat.

No. 1 Colorado wheat shall be sound, plump and well cleaned. Colorado.

No. 2 Colorado wheat shall be sound, reasonably clean and of good milling quality.

No. 3 Colorado wheat shall include Colorado wheat not cleaned and plump enough for No. 2, but weighing not less than fifty-four pounds to the measured bushel.

RULE II.—SPRING WHEAT.

No. 1 Northern spring wheat—must be northern grown spring wheat, sound and well cleaned, and must contain not less than 50 per cent. of the hard varieties of spring wheat. ^{Northern spring wheat.}

No. 1 spring wheat shall be sound, plump and well cleaned. Spring wheat.

No. 2 spring wheat shall be sound, reasonably clean and of good milling quality.

No. 3 spring wheat shall include all inferior, shrunken or dirty spring wheat weighing not less than fifty-three pounds to the measured bushel.

No. 4 spring wheat shall include spring wheat damp, musty, grown, badly bleached, or for any cause which renders it unfit for No. 3.

White spring wheat—The grades of Nos. 1, 2 and 3 white spring wheat shall correspond with the grades of Nos. 1, 2 and 3 spring wheat, except that they shall be of the white variety, or shall contain 5 per cent., or more, of such white wheat.

Black Sea and Flinty Fife wheat shall in no case be inspected higher than No. 2, and rice wheat no higher than No 4.

Frosted wheat—shall in no case be graded higher than No. 4, except that the grade of No. 3 may contain as much of said frosted wheat as it is customary to allow of wheat damaged in any other way.

RULE II_h.—MIXED WHEAT.

The grades of Nos. 2 and 3 mixed wheat shall be equal in quality to the grades Nos. 2 and 3 red winter wheat; except that they shall include mixtures of spring and winter wheat.

RULE III.—CORN.

- Yellow.** No. 1 yellow corn shall be yellow, sound, dry, plump and well cleaned.
 No. 2 yellow corn shall be three-fourths yellow, dry, reasonably clean, but not plump enough for No. 1.
 No. 3 yellow corn shall be three-fourths yellow, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.
- White.** No. 1 white corn shall be sound, dry and plump, and well cleaned.
 No. 2 white corn shall be seven-eighths white, dry, reasonably clean, but not plump enough for No. 1.
 No. 3 white corn shall be seven-eighths white, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.
- No. 1.** No. 1 corn shall be mixed corn of choice quality, sound, dry and well cleaned.
- No. 2.** No. 2 corn shall be mixed corn, dry, reasonably clean, but not good enough for No. 1.
- No. 3.** No. 3 corn shall be mixed corn, reasonably dry and reasonably clean, but not sufficiently sound for No. 2.
- No. 4.** No. 4 corn.—Corn that is badly damaged, damp or very dirty shall be graded no higher than No. 4.
 Corn that is wet or in heating condition shall not be graded.

RULE IV.—OATS.

- White.** No. 1 white oats shall be white, sound, clean and reasonably free from other grain.
 No. 2 white oats shall be seven-eighths white, sweet, reasonably clean and reasonably free from other grain.
 No. 3 white oats shall be seven-eighths white, but not sufficiently sound and clean for No. 2.
- No. 1.** No. 1 oats shall be mixed oats, sound, clean and reasonably free from other grain.
- No. 2.** No. 2 oats shall be sweet, reasonably clean and reasonably free from other grain.
- No. 3.** No. 3 oats shall be all oats that are damp, unsound, dirty, or from any other cause unfit for No. 2.
- No. 1**
White clipped No. 1 white clipped oats shall be white, sound, clean, reasonably free from other grain, and shall weigh not less than 36 pounds to the measured bushel.
- No. 2**
White clipped No. 2 white clipped oats shall be seven-eighths white, sweet, reasonably clean, reasonably free from other grain, and shall weigh not less than 34 pounds to the measured bushel.

RULE V.—RYE.

- No. 1.** No. 1 rye shall be sound, plump and well cleaned.
- No. 2.** No. 2 rye shall be sound, reasonably clean and reasonably free from other grain.
- No. 3.** All rye damp, musty, dirty, or from any cause unfit for No. 2 shall be graded as No. 3.

RULE VI.—BARLEY.

No. 1 barley shall be sound, plump, bright, clean and free from No. 1. other grain.

No. 2 barley shall be of healthy color, not sound and not plump No. 2. enough for No. 1, reasonably clean and reasonably free from other grain.

No. 3 barley shall include slightly shrunken and otherwise No. 3. slightly damaged barley not good enough for No. 2.

No. 4 barley shall include all barley fit for malting purposes not No. 4. good enough for No. 3.

No. 5 barley shall include all barley which is badly damaged, or No. 5. from any cause unfit for malting purposes; except that barley which has been chemically treated shall not be graded at all.

The grades of Nos. 1, 2 and 3 Scotch barley shall correspond in Scotch. all respects with the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Scotch variety.

The grades of Nos. 1, 2 and 3 Bay Brewing barley shall conform Bay Brewing. in all respects to the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Bay Brewing variety grown in the Territories and on the Pacific coast.

The grades of Nos. 1, 2 and 3 Chevalier barley shall conform in Chevalier. all respects to the grades of Nos. 1, 2 and 3 barley; except that they shall be of the Chevalier variety grown in the Territories and on the Pacific coast.

RULE VII.

The word "new" shall be inserted in each certificate of inspection of a newly harvested crop of oats until the fifteenth day of August; of rye, until the first day of September; of wheat, until the first day of November, and of barley until the first day of May of each year.

This change shall be construed as establishing new grades for the times specified, to conform to the existing grades of grain in all particulars, excepting the distinctions hereby established between the new and the old crop, and shall apply to grain inspected from store for two months after the times respectively above specified.

RULE VIII.

All grain that is warm, or that is in a heating condition, or is otherwise unfit for warehousing, shall not be graded.

RULE IX.

All inspectors shall make their reasons for grading grain, when necessary, fully known by notations on their books. The weight alone shall not determine the grade.

RULE X.

Each inspector is required to ascertain the weight per measured bushel of each lot of wheat inspected by him and note the same on his book.

ADMINISTRATION AND WAREHOUSE REGISTRATION.

Extracts from the rules adopted by the Railroad and Warehouse Commissioners for the administration of the departments of grain inspection and warehouse registration in the city of Chicago in force from and after March 1, 1893.

"Plugged,"
"Loaded," or
"Scoured" grain.

"The said Chief Inspector, and all persons inspecting grain under his direction, shall in no case make the grade of the grain above that of the poorest quality found in any lot of grain inspected, when it has evidently been "plugged," or otherwise improperly "loaded," for the purpose of deception. Wheat which has been subjected to "scouring," or to some process equivalent thereto, shall not be graded higher than No. 3."

Attempts at
fraud, or
interference.

"All persons employed in the inspection of grain shall promptly report to the Chief Inspector, in writing, all attempts to defraud the system of grain inspection established by law, and all instances where warehousemen shall deliver, or attempt to deliver, grain of a lower grade than that called for by the warehouse receipt."

"They shall also, in the same manner, report all attempts of receivers or shippers of grain, or any other person interested therein, to instruct, or in any improper way to influence the action or opinion of any inspector in the discharge of his duty; and the Chief Inspector shall report all such cases to the Commission."

Extracts from the Law of Illinois, Revised Statutes, Chapter 114, Section 138:

"Any duly authorized Inspector of Grain who shall be guilty of neglect of duty, or who shall knowingly or carelessly inspect or grade any grain improperly, or who shall accept any money or other consideration, directly or indirectly, for any neglect of duty, or the improper performance of any duty, as Inspector of Grain, and any person who shall improperly influence any Inspector of Grain in the performance of his duties as such Inspector, shall be deemed guilty of a misdemeanor, and, on conviction, shall be fined in a sum of not less than \$100, nor more than \$1,000, in the discretion of the Court, or shall be imprisoned in the county jail not less than three, nor more than twelve months, or both, in the discretion of the Court."

INSPECTION AND WEIGHING RATES.

GRAIN (STATE INSPECTION).

For inspecting grain from cars, per car.....	\$0 25
For inspecting grain from wagons, per load.....	10
For inspecting grain from canal-boats, per M bu.....	40
For inspecting grain to vessels, per M bu.....	50
For inspecting grain to cars, in bulk, per car.....	35
For inspecting grain to teams, per car.....	35
For inspecting grain to teams, per load.....	10
For inspecting grain in sacks, per bu.....	00¼

D. W. ANDREWS, *Chief Inspector.**Railroad and warehouse commissioners, in charge of grain inspection:*

WILLIAM S. CANTRELL, THOMAS GAHAN, GEO. W. FITHIAN.

Registrar:

LOUIS WAGNER, Room 808, 218 La Salle Street.

Committee of appeals on grain inspection:

PETER MCGURN, AUSTIN SAUNDERS, JOHN J. McDERMID.

FLOUR.

For inspecting flour, per brl., or its equivalent in sacks.....	\$0 02
---	--------

R. W. RATHBORNE, *Chief Inspector.*

PROVISIONS.

Sampling, including re-packing and coopering:

For inspecting beef and pork—for the first five barrels, per brl.....	\$0 80
For inspecting beef and pork—for each additional brl.....	25
For inspecting S. P. meats—for the first five tierces, per tc.....	1 00
For inspecting S. P. meats—for each additional tc.....	25
For inspecting boxed meats—for the first five boxes, per box.....	1 00
For inspecting boxed meats—for each additional box.....	50

In case the whole of the lot is inspected, not including labor and coopering:

For inspecting beef and pork, per brl.....	\$0 10
For inspecting S. P. meats—in lots of fifty tierces or more, per tc.....	12½
For inspecting S. P. meats—in lots of less than fifty tierces, per tc.....	15
For inspecting S. P. meats—in lots of one hundred tierces or more, per tc.....	10
For inspecting bulk or boxed meats—in car-load lots or more, per M lbs..	15
For inspecting lard—in lots of one hundred tierces or more, per tc.....	04
For inspecting tallow and grease, per tc.....	05

I. T. SUNDERLAND, *Chief Inspector.*

FLAXSEED.

For inspecting flaxseed received in bulk—for each car-load of one grade..	\$0 75
For inspecting flaxseed received in bulk—where two or more grades are found in the same car—for each grade.....	50
For each one thousand bushels from elevator or warehouse to lake transportation.....	75
For each two-bushel bag.....	00½
For each four-bushel bag.....	01
For each wagon-load*.....	16½

S. H. STEVENS, *Chief Inspector.*

GRAIN BY SAMPLE.

For inspecting grain by sample, per car.....	\$0 30
For inspecting grain from warehouse, per M bu.....	25

L. A. MOREY,	} <i>Grain Samplers.</i>
WM. McDOUGALL,	
ROBERT P. KETTLES,	

WEIGHING CHARGES.

Lard and grease, not including breaking down and re-piling, in lots of one hundred packages or more, per package.....	\$0 04
For the labor of breaking down and re-piling, to be refunded if not re-piled.	03
Tallow, in half hogsheads or smaller packages, per package.....	05
Tallow, in hogsheads, per package.....	10
Bulk meats, not including labor, per M lbs.....	10
For stripping lard or grease at regular warehouses—not less than five packages—per package.....	50
Grain, by cargo, from elevator to vessels, per M bu.....	15
Grain, from canal-boats, per boat-load.....	1 00
Grain in bulk, at regular transfer stations, per car-load.....	30
Flaxseed in bags or bulk, per car, not including handling labor.....	30

Handled at the expense of the weigher :

Grain, seed, beans, potatoes and similar articles in bags, per bag.....	02
Sugar, in hogsheads and boxes, per 100 lbs.....	02
Salt, in sacks, per 100 lbs.....	02
Sugar, salt, dried fruit and similar articles, in barrels, per brl.....	04
Butter and lard, in kegs, per package.....	04
Wool, in lots of not less than 50 bales, per bale.....	08
Wool, in lots of 50 bales or more, per bale.....	07
Broom-corn, in lots of less than 50 bales, per bale.....	07
Broom-corn, in lots of 50 bales or more, per bale.....	06
Dressed hogs, each..	02
Pig iron and lead, per 100 lbs.....	02
Coal and salt, per ton.....	06

I. T. SUNDERLAND, *Weigher of packing-house products.*JOHN WALKER, *Weigher of other commodities.*JOHN PAX, *Sampler of grass seed.*

* Four wagon-loads to be counted as equal to 1 car-load.

COMMISSIONS.

The following rates of commission and brokerage, being just and reasonable, are hereby established as the minimum charges which shall be made for the transaction of the business hereinafter specified, by members of this Association :

For receiving, selling and accounting for the following kinds of property—

For the sale of property on consignment :

Wheat, rye and barley, by car-load lots, in store, free on board cars or vessels, on track, delivered or to be shipped from any other point.....	per bu.	\$0 01
Corn, by car-load lots, in store.....	"	00½
For selling corn, otherwise than in store.....	"	00½
Oats, by car-load lots.....	"	00½
For selling canal-boat loads of grain in store, or afloat, or free on board vessels.....	"	00½
Flaxseed, in bulk.....	1 per cent.	
Flaxseed, in bags.....	1½ "	
Clover seed, in car-load lots.....	1 "	
Clover seed, in less than car-load lots.....	1½ "	
Timothy seed.....	1½ "	
All other seeds, in bulk.....	1½ "	
Dressed hogs, in car-load lots.....	1½ "	
Dressed hogs, in less than car-load lots.....	1½ @ 2½ "	
Bran, shorts and millstuffs.....	\$3 50	per car.
Corn-meal.....	5 00	"
Broom-corn.....	00¼	per lb.

For the purchase and shipment of property :

Rye and barley, to be shipped by vessel cargo.....	per bu.	\$0 00½
Other grain, to be shipped by vessel cargo.....	"	00½
All grain, to be shipped by rail.....	"	00½
Lard, mess pork and other meats.....	½ of 1 per cent.	

For the purchase and sale of property in the Chicago market :

Grain of all kinds, in lots of 1,000 and 5,000 bushels.....	per bu.	\$0 00½
Lard, in lots of 50 and 250 tierces.....	per tce.	05
Mess pork, in lots of 50 and 250 barrels.....	per brl.	05
Other meats, in lots of 25,000 and 50,000 pounds.....	per M lbs.	25

In cases where the transaction is made for members of the Board one-half the last-named schedule may be charged.

Brokerage charges under limitations :

On all kinds of grain.....	per M bu.	\$0 12½
On lard.....	per tce.	00½
On mess pork.....	per brl.	00½
On other meats.....	per M lbs.	02½

CHICAGO ELEVATOR WAREHOUSES.

Regular under the rules of the Board of Trade.

Statement showing their capacity for the storage of grain December 31, 1895.

GRAIN STORAGE RATES FOR 1895.

On all grain and flaxseed received in bulk and inspected in good condition, three-quarters ($\frac{3}{4}$) of one (1) cent per bushel for the first ten (10) days or part thereof, and one-fourth ($\frac{1}{4}$) of one (1) cent per bushel for each additional ten (10) days or part thereof, so long as it remains in good condition.

On grain damp or liable to early damage as indicated by its inspection when received two (2) cents per bushel for the first ten (10) days or part thereof, and one-half ($\frac{1}{2}$) of one (1) cent per bushel for each additional five (5) days or part thereof.

No grain will be received in store until it has been inspected and graded by authorized inspectors, unless by special agreement.

GRAIN INSPECTION.

Number of cars inspected in, by months, during the year 1895.

CANAL STATISTICS (OFFICIAL).

The following statement shows the expenses of repairs, renewals, etc.; also the tolls collected, with the dates of the opening and closing of the Illinois and Michigan Canal, from 1850 to 1895, inclusive:

	Ordinary repairs.	Extra'd'y repairs, renewals, and hyd. works.	Gross expenses.	Tolls.	Canal opened.	Canal closed.	No. of days open.
1850.	\$38,418	\$19,996	\$58,415	\$125,504	Mar. 22	Dec. 6	259

				1895.....	279,948	21,301	301,149

NOTE.—Prior to the year 1820 no official records of the arrival of alien passengers were kept. It is estimated, however, that the total number arriving in the United States from the foundation of the government to the year 1820 was 250,000.

Up to the year 1856 no record was kept of immigrants in distinction from the arrival of alien passengers.

Of the number of immigrants arrived during the year ending June 30, 1895, there came from
 England..... 31,948 Scotland..... 5,888 Ireland..... 47,972 Wales..... 1,916
 Germany..... 36,351 Italy..... 36,937 Russia, ex. Poland, 32,053 Sweden..... 15,683
 Norway..... 7,373 China..... 974 Austria-Hungary, 33,462

The total number of European immigrants for the last fiscal year was 271,223.

Of the total number of immigrants for the year 1894, 924 were males and 120,024 were females. The year ending June 30, 1882, was the year of the greatest immigration.

Owing to the absence of law for the collection of statistics in relation to immigrants by railroads, those from the British North American possessions and from Mexico are not included since July 1, 1885.

PUBLIC DEBT OF THE UNITED STATES.

(Official.)

The following statement exhibits the amount of the debt of the United States Government in each year since 1790:

(a) Rhode Island and Massachusetts. (b) Exclusive of 5,321,706 tons colliery consumption.

NOTE.—The statistics for 1860, 1870 and 1880 are derived from the United States census. The statistics for the remaining years, except for 1887, are compiled from data collected and estimates made by Mr. Frederick E. Seward, editor of the Coal Trade Journal of New York, and by H. V. & H. W. Poor, and those for 1887 are furnished by the United States Geological Survey.

EXPORTS AND IMPORTS OF THE UNITED STATES.

Statement showing the value of exports and imports of the United States, annually, for the years 1850 to 1895, inclusive.
(Official figures of the U. S. Bureau of Statistics.)

Year ending June 30.	EXPORTS.					IMPORTS.						
	Cotton, unmanufactured. Value.	Breadstuffs, provisions and vegetables. Value.	Other domestic products, except cotton and bullion. Value. DOMESTIC EXPORTS OF THE UNITED STATES.

The following table exhibits the value of the exports of domestic products, except gold and silver, during the years (ending June 30) 1893, 1894 and 1895.

	1895.	1894.	1893.
Cotton—unmanufactured	204,900,990		
manufactures of	13,271,080		
Bread and breadstuffs	\$218,172,070	\$224,733,407	\$300,186,707
Provisions, comprising meat and dairy products, including vegetables	114,603,115	166,774,558	200,311,654
Oils—mineral	126,777,703	132,238,861	125,993,279
animal	46,647,019		
vegetable	7,685,459		
Wood, and manufactures of	7,335,116	61,667,594	60,641,170
Tobacco, and manufactures of	27,115,907	27,715,563	26,734,392
Iron and Steel, and manufactures of	29,732,133	27,924,686	26,942,454
Animals, living	28,813,937	26,148,760	26,801,067
Leather, and manufactures of	35,754,049	35,698,180	27,527,965
Oil cake and oil-cake meal	14,604,179	13,505,613	11,321,400
Hops	7,165,587	8,807,807	9,688,773
Seeds	1,872,597	3,844,194	2,685,867
Spirits of turpentine	2,849,145	7,941,935	3,993,729
Coal	3,998,277	3,487,245	3,893,436
Drugs, chemicals, medicines, acids and dye-stuffs	11,088,627	11,912,136	10,004,138
Furs and fur skins	7,362,429	6,780,337	5,961,140
Agricultural implements	3,921,505	4,223,485	3,699,579
Carriages, cars, carts, and parts of	5,413,075	5,027,828	4,657,463
Sugar—refined	2,522,724	3,444,559	2,682,075
(brown sugar and molasses.	406,894		
Tallow	872,452	1,279,346	1,717,640
Naval stores (resin, turpentine, tar and pitch)	1,293,059	2,766,164	3,129,059
Sewing machines, and parts of	3,421,496	3,253,703	3,393,865
Fruits, green and dry	2,290,139	2,347,199	2,476,446
Metals, and manufactures of	4,971,791	2,430,965	3,919,690
Copper, and manufactures of	3,556,630	4,123,697	3,780,081
Distilled spirits	15,573,218	22,132,856	8,903,911
Paper and stationery	2,991,686	5,676,986	2,724,057
Clocks, watches, and parts of	2,886,748	2,587,476	2,048,025
Ordnance and ordnance stores	1,204,005	1,302,778	1,204,181
Hides and skins, other than furs	2,064,184	1,625,657	1,584,784
Musical instruments	2,310,323	3,972,487	1,497,003
Fancy goods, including perfumery and toilet soaps	1,115,727	972,115	1,824,107
Manures (fertilizers)	483,151	429,035	447,668
Quicksilver	5,741,262	5,038,445	3,927,343
Books and other publications	425,724	618,297	204,908
Glass and glassware	2,316,217	2,618,625	1,808,873
Wearing apparel, including hats, caps and bonnet	946,381	921,402	973,827
Ginseng	1,845,112	1,570,764	1,265,526
Hemp, and manufactures of	826,713	619,114	792,928
Cordage, rope and twine	564,252	591,032	580,963
Soap	1,158,307	1,120,992	1,197,852
Mathematical, philosophical and optical Instr' mts	947,470	1,038,430	903,584
India rubber and gutta percha, and man'frs of...	1,912,771	1,533,996	1,345,621
Marble, and manufactures of	1,605,142	1,461,792	1,009,406
Ale, beer and porter	968,538	1,054,704	856,509
Hair, and manufactures of	558,770	546,940	665,538
Paints and painters' colors	605,029	353,729	459,648
Wool, and manufactures of	729,706	822,932	700,308
Paintings and statuary	838,535	547,667	118,447
Starch	471,104	391,763	210,862
Fish	366,800	727,008	707,063
All other commodities	4,294,789	3,402,183	4,760,769
	17,619,112	17,844,104	17,429,670
Total value of exports of domestic merchandise	\$793,397,890	\$869,207,941	\$830,876,908

NOTE.—Carried in cars and other vehicles

Carried in American vessels—steam	\$ 38,887,513	\$ 45,387,365
Carried in American vessels—sailing	21,587,184	60,474,697
Carried in foreign vessels—steam	632,282,443	
Carried in foreign vessels—sailing	55,253,386	687,536,828

IMPORTS OF MERCHANDISE INTO THE UNITED STATES.

The following table exhibits the value of imports of merchandise during 1893, 1894 and 1895—the years ending June 30.

		1895.	1894.	1893.
Sugar and molasses—sugar.....	\$76,461,557			
Molasses—Melada and syrup.....	1,295,146			
Wool—raw.....	\$27,536,885	\$77,756,703	\$128,871,960	\$118,248,118
manufactures of.....	36,658,738			
Silks—raw.....	\$22,638,056	64,093,623	25,546,788	59,113,671
manufactures of.....	31,205,440			
Coffee.....		53,831,496	41,045,532	68,794,914
Iron and steel, and manufactures of.....		96,129,326	90,309,561	80,485,656
Chemicals, drugs, medicines, dyes, etc.....		10,904,394	9,344,878	18,615,131
Cotton—raw.....	\$ 4,714,817	41,845,499	35,960,291	51,213,917
manufactures of.....	30,428,561			
Hides and skins, other than furs.....		35,143,378	23,697,936	36,500,441
Tin and manufactures of.....		26,122,942	16,786,152	28,347,692
Flax—raw.....	\$ 2,059,291	18,931,504	14,593,706	29,694,699
manufactures of.....	18,985,375			
Fruits and nuts.....		20,994,666	14,541,641	22,435,720
Tea.....		17,239,905	18,752,664	23,673,422
India rubber, gutta percha, and manufactures of.....		13,170,924	14,143,107	13,857,433

REMARKS.—Included in the above exports of beef for 1895 are 191,338,467 lbs. of fresh beef, valued at \$1,633,880, of which 190,738,186 lbs. were shipped to the United Kingdom. There were also exported 591,440 lbs. of fresh mutton, valued at \$17,822; and preserved meats in tin cans of the value of \$5,720,853. Of the total exports \$87,515,253 worth was carried in *foreign vessels*, and but \$80,322,877 in value transported in American craft.

In the United States the values of exports of domestic merchandise are their values as given by the exporters at the time of exportation.

COMPARATIVE STATEMENT OF THE COMMERCE

Through Saint Mary's Falls Canal, Mich., for the seasons of 1894 and 1895.

NOTE.—Up to 1850 only the aggregate valuations in the several counties were reported to the State officers, and from 1852 to 1857, inclusive, a few counties returned only the aggregates; hence the details of real estate and personal property valuations are not complete for those years. In 1867 and 1868 the details of valuation are not entirely correct, owing to changes by the operation of the equalization law. Since 1868 the valuations are as equalized. The total valuations in each of the several years are correct and official.

The valuations for 1873 as equalized are largely in excess of any previous year. In 1874 some changes were made in the manner of equalizing the assessments, resulting in reducing all the valuations, especially those of railroad property.

The State debt, as noted, represents it as it stood on the 1st of January in each of the several years to 1869; in 1869 and 1870, as it stood December 1; in 1871, as it stood December 31; from 1872 to 1879, as it stood December 1.

CHICAGO REAL ESTATE AND PERSONAL PROPERTY.

Valuation for purposes of taxation, also the taxes levied, and the public debt of the city in each year since 1852.

NOTE.—From 1851 to 1862, inclusive, a lamp tax of half a mill to two mills was levied on certain portions of the city, and is included in the above total tax. The city debt as noted represents it as it stood on February 10 in 1862 to 1864, inclusive; on February 1 in 1865 to 1867, inclusive; on April 1 in 1868 to 1874, inclusive; and on Dec. 31, since 1874. Valuations for 1816 to 1863, inclusive, are by the county assessment, as equalized by the State Board of Equalization, and in some of these years do not include railroad property. The city tax on railroad property for 1862 and 1863, something over \$100,000 for each year, is not included in the above total tax. The above figures for 1869 include the districts annexed to the city of Chicago July 15 of that year.

ILLINOIS CENTRAL RAILROAD.

The following official table shows the amount of gross receipts of the Illinois Central Railroad since its completion to October 31, 1895, and the amount of tax paid into the State Treasury in accordance with the provisions of its charter :

	Gross receipts.	Per cent of tax.	Amount paid into the State Treasury.
From March 24, 1855, to October 31, 1855.....	\$ 595,633 86	5 %	\$ 29,751 50

UNITED KINGDOM.

Production and imports of wheat and flour; also the population, during the cereal years ending August 31, from 1870 to 1895.

[Compiled from Beerbohm's tables; also from data furnished by Mr. John Jones, the reporter of foreign markets for this Board, resident in London.]

Cereal Year.	Acreage June 25, including the islands.	Estimated yield per acre.	Total home produce.	Imports.	Exports.	Net imports.	Total available for home consumption (not including seed).	Population June 25, each year.	Supposed requirements for home consumption (not including seed) at the rate of 5½ bu. per head.	Averages per quarter.

1895-96	1,526,200	26 23	4,647,032	4,191,970	235,920	24,054,870	26,140,940	38,568,912	26,535,323	25 0

NOTE.—In the above table the estimated yield per acre was, up to 1884, that of the best authorities, helped by a calculation of the results in each season; in the following years the Government figures have been adopted. In estimating the rate of consumption the conventional rate of 5½ bushels per capita, is taken up to 1880-81, since when the rate of 6 bushels per capita has been assumed, such being considered nearer the actual consumption.
